4. What Are You A	Applying For?				
Based on the type of wo to be supplied in order f	ork proposed and the location and protected status of the or the Local Planning Authority to determine the applicat	e trees involved, there are various details and ion.	supporting information that will need		
Are you seeking consent for works to tree(s) subject to a Tree Preservation Order?			Yes No		
Are you wishing to carry out works to tree(s) in a conservation area?			Yes ONo		
Documents and plans (for any tree)					
A sketch plan clearly showing the position of trees listed in the question 'Identification of Tree(s) and Description of Works' MUST be provided when applying for works to trees covered by a Tree Preservation Order. A sketch plan is also advised when notifying the LPA of works to trees in a conservation area (see guidance notes).					
It would also be helpful if you provided details of any advice given on site by an LPA officer.					
Are you providing additional information in support of your application (e.g. an additional schedule of work for question Yes No 'Identification of Tree(s) and Description of Works')?					

If Yes, please provide the reference numbers of plans, documents, professional reports, photographs etc in support of your application 24 Herrison Cottages Visual Tree Inspection and Health Appraisal 5. Identification of Tree(s) and Description of Works Please identify the tree(s) and provide a full and clear specification of the works you want to carry out. You might find it useful to contact an arborist (tree surgeon) for help with defining appropriate work. Where trees are protected by a Tree Preservation Order, please number them as shown in the First Schedule to the Tree Preservation Order where this is available. You should use the same numbering on your sketch plan (see help for sketch plan requirements). Please provide the following information: - The number used on the sketch plan; and - A description of the proposed works. Where trees are protected by a Tree Preservation Order you must also provide: - Reasons for the work; and where trees are being felled: - Proposals for plenting replacement trees (including quantity, species, position and size) or reasons for not wanting to replant. - g. Oak (T3) - fell because of excessive shading and low amenity value. Replant with one standard ash in same position. Elefer (T1) - Prune the top to give around 0.75-fm clearance on the overhead cable Sycamore (T3) - Fell as too close to boundary fence (formally pollarized at approximately 4.5m Sycamore (T3) - File asteromet, and retirately transfers to give around 0.75-m clearance around the BT cable Sycamore (T3) - File asteromet, and retirately transfers to give around 0.75-m clearance around the BT cable Sycamore (T3) - File asteromet, and retirately transfers to give around 0.75-m clearance around the BT cable Sycamore (T3) - File asteromet, and retirately transfers to give around 0.75-m clearance around the BT cable Sycamore (T3) - File asteromet, and retirately transfers to give around a standard and intermental growth. Remove archivesters to give around the process of the proposed formal prof
