

Appendix 2 – Screening Assessment Form (Version 10.3)

If you are undertaking a small development (i.e. one house in a garden) this Screening Assessment Form can be used as a basic contamination assessment, which fulfils the requirements of the 'Existing Use' section of the planning application form. This form may be used in other circumstances at the discretion of the Local Planning Authority, but please check with them first.

This Screening Assessment Form is not suitable for larger housing developments, allotments, schools, nurseries, children's play areas, playing fields, or if there has been a past industrial use on or adjacent to the land. In these instances you will need to submit a Phase 1 Report (Preliminary Risk Assessment) and if appropriate, subsequent Phase 2 (Site Investigation and Risk Assessment), Phase 3 (Remediation Strategy) and Phase 4 (Verification) Reports.

NOTE: Failure to provide the required information at this stage may result in a delay in the application process and the imposition of planning conditions relating to land contamination.

If at any point when completing the form you suspect there is a likelihood that contamination may exist on the site (or on an adjacent site) which could affect the proposed use, it is strongly advised that you contact the Council's Contaminated Land Officer before proceeding, as your findings may necessitate the submission of a more detailed Phase 1 Report.

Please complete this form in BLOCK LETTERS and submit with photographs to the Local Planning Authority with your completed Planning Application Form.
