**Ordnance Survey Plan**
**Published 1940 - 1951**
**Source map scale - 1:10,000**

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1940's, the 1:10,560 scale, was adopted for mapping urban areas; these maps were used to update the 1:10,560 maps. The published date given therefore is often some years later than the surveyed date; before 1935, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in matching sheets. In the New Series, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unlimited with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first Metric Survey was published, employing the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

**Historical Aerial Photography**
**Published 1947 - 1949**
**Source map scale - 1:1,250**

The historical Aerial Photos were produced by the Ordnance Survey at a scale of 1:1,250 and 1:10,560 from RAF and USAAF aerial photography. They were produced for military intelligence purposes and were not intended for the preparation of conventional mapping, due to post war resource shortages, there security measures in the 1950's meant that every photograph was removed for potentially useful information with security slots replaced by fake ones. Many of the 1:1,250 scale photographs were taken and only later made available to the public. The original RAF photographs are of high detail for the accuracy of the period, without covering both, however there was a need to split the data. Where possible Landmark have included both versions.

**Additional SIMs**
**Published 1953 - 1964**
**Source map scale - 1:1,250**

The OS cards (Ordnance Survey's 'Names of Boundaries on record plan') are further, minor editions of mapping which was produced and published in between the publication of the main scheduled editions. Each card is numbered to follow, and contain detailed information on buildings, roads and features. These maps were produced at both 1:2,500 and 1:1,250 scales.
