Certificate date: 15th January 2021

Negative Bat Certificate

This is to certify that Russell Hoyle (Natural England class 2 licence holder) of ABR Ecology Ltd visited: 34 Goldcroft Avenue, Weymouth, Dorset, DT4 0ET (central grid reference: SY 67173 79855) on the 13th January 2021. Unless the physical condition of the building changes, this report is considered valid for three years.

We can confirm that no evidence of bat activity was recorded.

Russell Hoyle ACIEEM, Ecologist

As there is always a chance that the presence of bats may have been missed, works to the property should proceed with caution. If at any stage bats or evidence of bats are found, please ensure work is stopped immediately and a suitably qualified ecologist should be contacted for further advice before proceeding. Unless further information is received that suggests circumstances may have changed, negative bat checks will be considered valid for 3 years.

Please refer to our report (Reference: PRA Report – 34 Goldcroft Avenue, Weymouth) for a full account of our observations made during the biodiversity survey.
