**Dear David,**

**I visited the above address recently to look at the Beech tree as part of tree works application 21/0002/TRE.**

**The tree has a lean to the East, is multi-stemmed and in close proximity to both the above address and the Inverkip Church building.**

**The owner is very concerned about the tree being so close to her property and the church and the possible insurance implications.**

**I have advised a 20% reduction of the tree to reduce windage and overall crown weight. This will reduce the potential of lower stem failure and any resulting damage.**

**Many Thanks,**  
***Alan Fielding***
