Local Authority Health Profile 2019

This profile gives a picture of people's health in Blaby. It is designed to act as a 'conversation starter', to help local government and health services understand their community's needs, so that they can work together to improve people's health and reduce health inequalities.

Visit <https://fingertips.phe.org.uk/profile/health-profiles> for more area profiles, more information and interactive maps and tools.

Health in summary

The health of people in Blaby is generally better than the England average. Blaby is one of the 20% least deprived districts/unitary authorities in England, however 9.3% (1,610) of children live in low income families. Life expectancy for both men and women is higher than the England average.

Health inequalities

Life expectancy is 2.5 years lower for men in the most deprived areas of Blaby than in the least deprived areas.

Child health

In Year 6, 15.6% (166) of children are classified as obese, better than the average for England. The rate for alcohol-specific hospital admissions among those under 18 is 11*, better than the average for England. This represents 2 admissions per year. Levels of GCSE attainment (average attainment 8 score) and breastfeeding are worse than the England average. Levels of smoking in pregnancy are better than the England average.

Adult health

The rate for alcohol-related harm hospital admissions is 573*, better than the average for England. This represents 567 admissions per year. The rate for self-harm hospital admissions is 121*, better than the average for England. This represents 115 admissions per year. The rates of new sexually transmitted infections, killed and seriously injured on roads and new cases of tuberculosis are better than the England average. The rate of hip fractures in older people (aged 65+) is worse than the England average. The rates of violent crime (hospital admissions for violence), under 75 mortality rate from cardiovascular diseases and under 75 mortality rate from cancer are better than the England average.

* rate per 100,000 population

Indicator value types

1,2 Life expectancy - years 3,4,5 Directly age-standardised rate per 100,000 population aged under 75 6 Directly age-standardised rate per 100,000 population aged 10 and over 7 Crude rate per 100,000 population 8 Directly age-standardised rate per 100,000 population 9 Directly age-standardised rate per 100,000 population aged 65 and over 10 Proportion - % of cancers diagnosed at stage 1 or 2 11 Proportion - % recorded diagnosis of diabetes as a proportion of the estimated number with diabetes 12 Proportion - % recorded diagnosis of dementia as a proportion of the estimated number with dementia 13 Crude rate per 100,000 population aged under 18 14 Directly age-standardised rate per 100,000 population 15, 16, 17 Proportion 18 Crude rate per 1,000 females aged 15 to 17 19, 20 Proportion 21 Crude rate per 1,000 live births 22 Proportion 23 Index of Multiple Deprivation (IMD) 2015 score 24 Proportion 25, 26 Slope index of inequality 27 Proportion 28 Mean average across 8 qualifications 29 Proportion 30 Crude rate per 1,000 households 31 Directly age-standardised rate per 100,000 population 32 Ratio of excess winter deaths to average of non-winter deaths 33 Crude rate per 100,000 population aged 15 to 64 (excluding Chlamydia) 34 Crude rate per 100,000 population

*	Value compared to a goal (see below)
~	Value suppressed for disclosure control due to small count
\$	Due to an issue with HES coding in Nottingham University Hospitals Trust in 2016/17, for which over 30% of records did not have a valid geography of residence assigned, this value should be treated with caution. In 2015/16, between 10% and 20% of patients that attended hospital from this area were treated at Nottingham University Hospitals Trust.
^	Aggregated from all known lower geography values

Thresholds for indicators that are compared against a goal

Indicator Name	Green	Amber
12 Estimated dementia diagnosis rate (aged 65 and over)	>= 66.7%	< 66.7%
