RE: Discharge of Condition 1 of Prior Approval 19/03226/PAO2R

Dear Sir / Madam,

Please see attached detailed quote with descriptions and drawings for soundproofing to discharge Condition 1 of Prior Approval Reference 19/03226/PAO2R.

Condition 1 requires a written approval of detailing sound transmission reduction measures to be installed the ground floor use and the first floor. The scheme shall be designed to provide at least DNTw+Ctr 50dB. The contractor proposed 3 methods of achieving the required results. We will use "FLOOR ONLY OPTION" as described in the document.

The contractor guarantees to meet a minimum of DNTw+Ctr 50dB, with before and after sound tests to be carried out to confirm.

I therefore trust the attached information is sufficient to enable Conditions 1 of Prior Approval Reference 19/03226/PAO2R.

Kind regards,
Shukhrat Issabayev
