

Jan,

We have tried but unfortunately we cannot get any historic traffic data from the County Council.

According to our Clients lease the site is designated for B1, B2 & B8 use already. Therefore our Clients proposed use falls within the already designated site usage and we are not really applying for a change of use as such but the installation of a modular office and sliding gate.

Therefore the question about changes to traffic should not apply and a transport assessment not needed.

As we stated in our submission the use is very small anyway. It is not as if we are suggesting 100 lorry movements per day!

In respect of your other queries I enclose an email from our Client outlining their intended usage with a few photos. We also confirm that the remaining existing buildings will be used for storage purposes.

Can you let me know that our application can be registered now please?

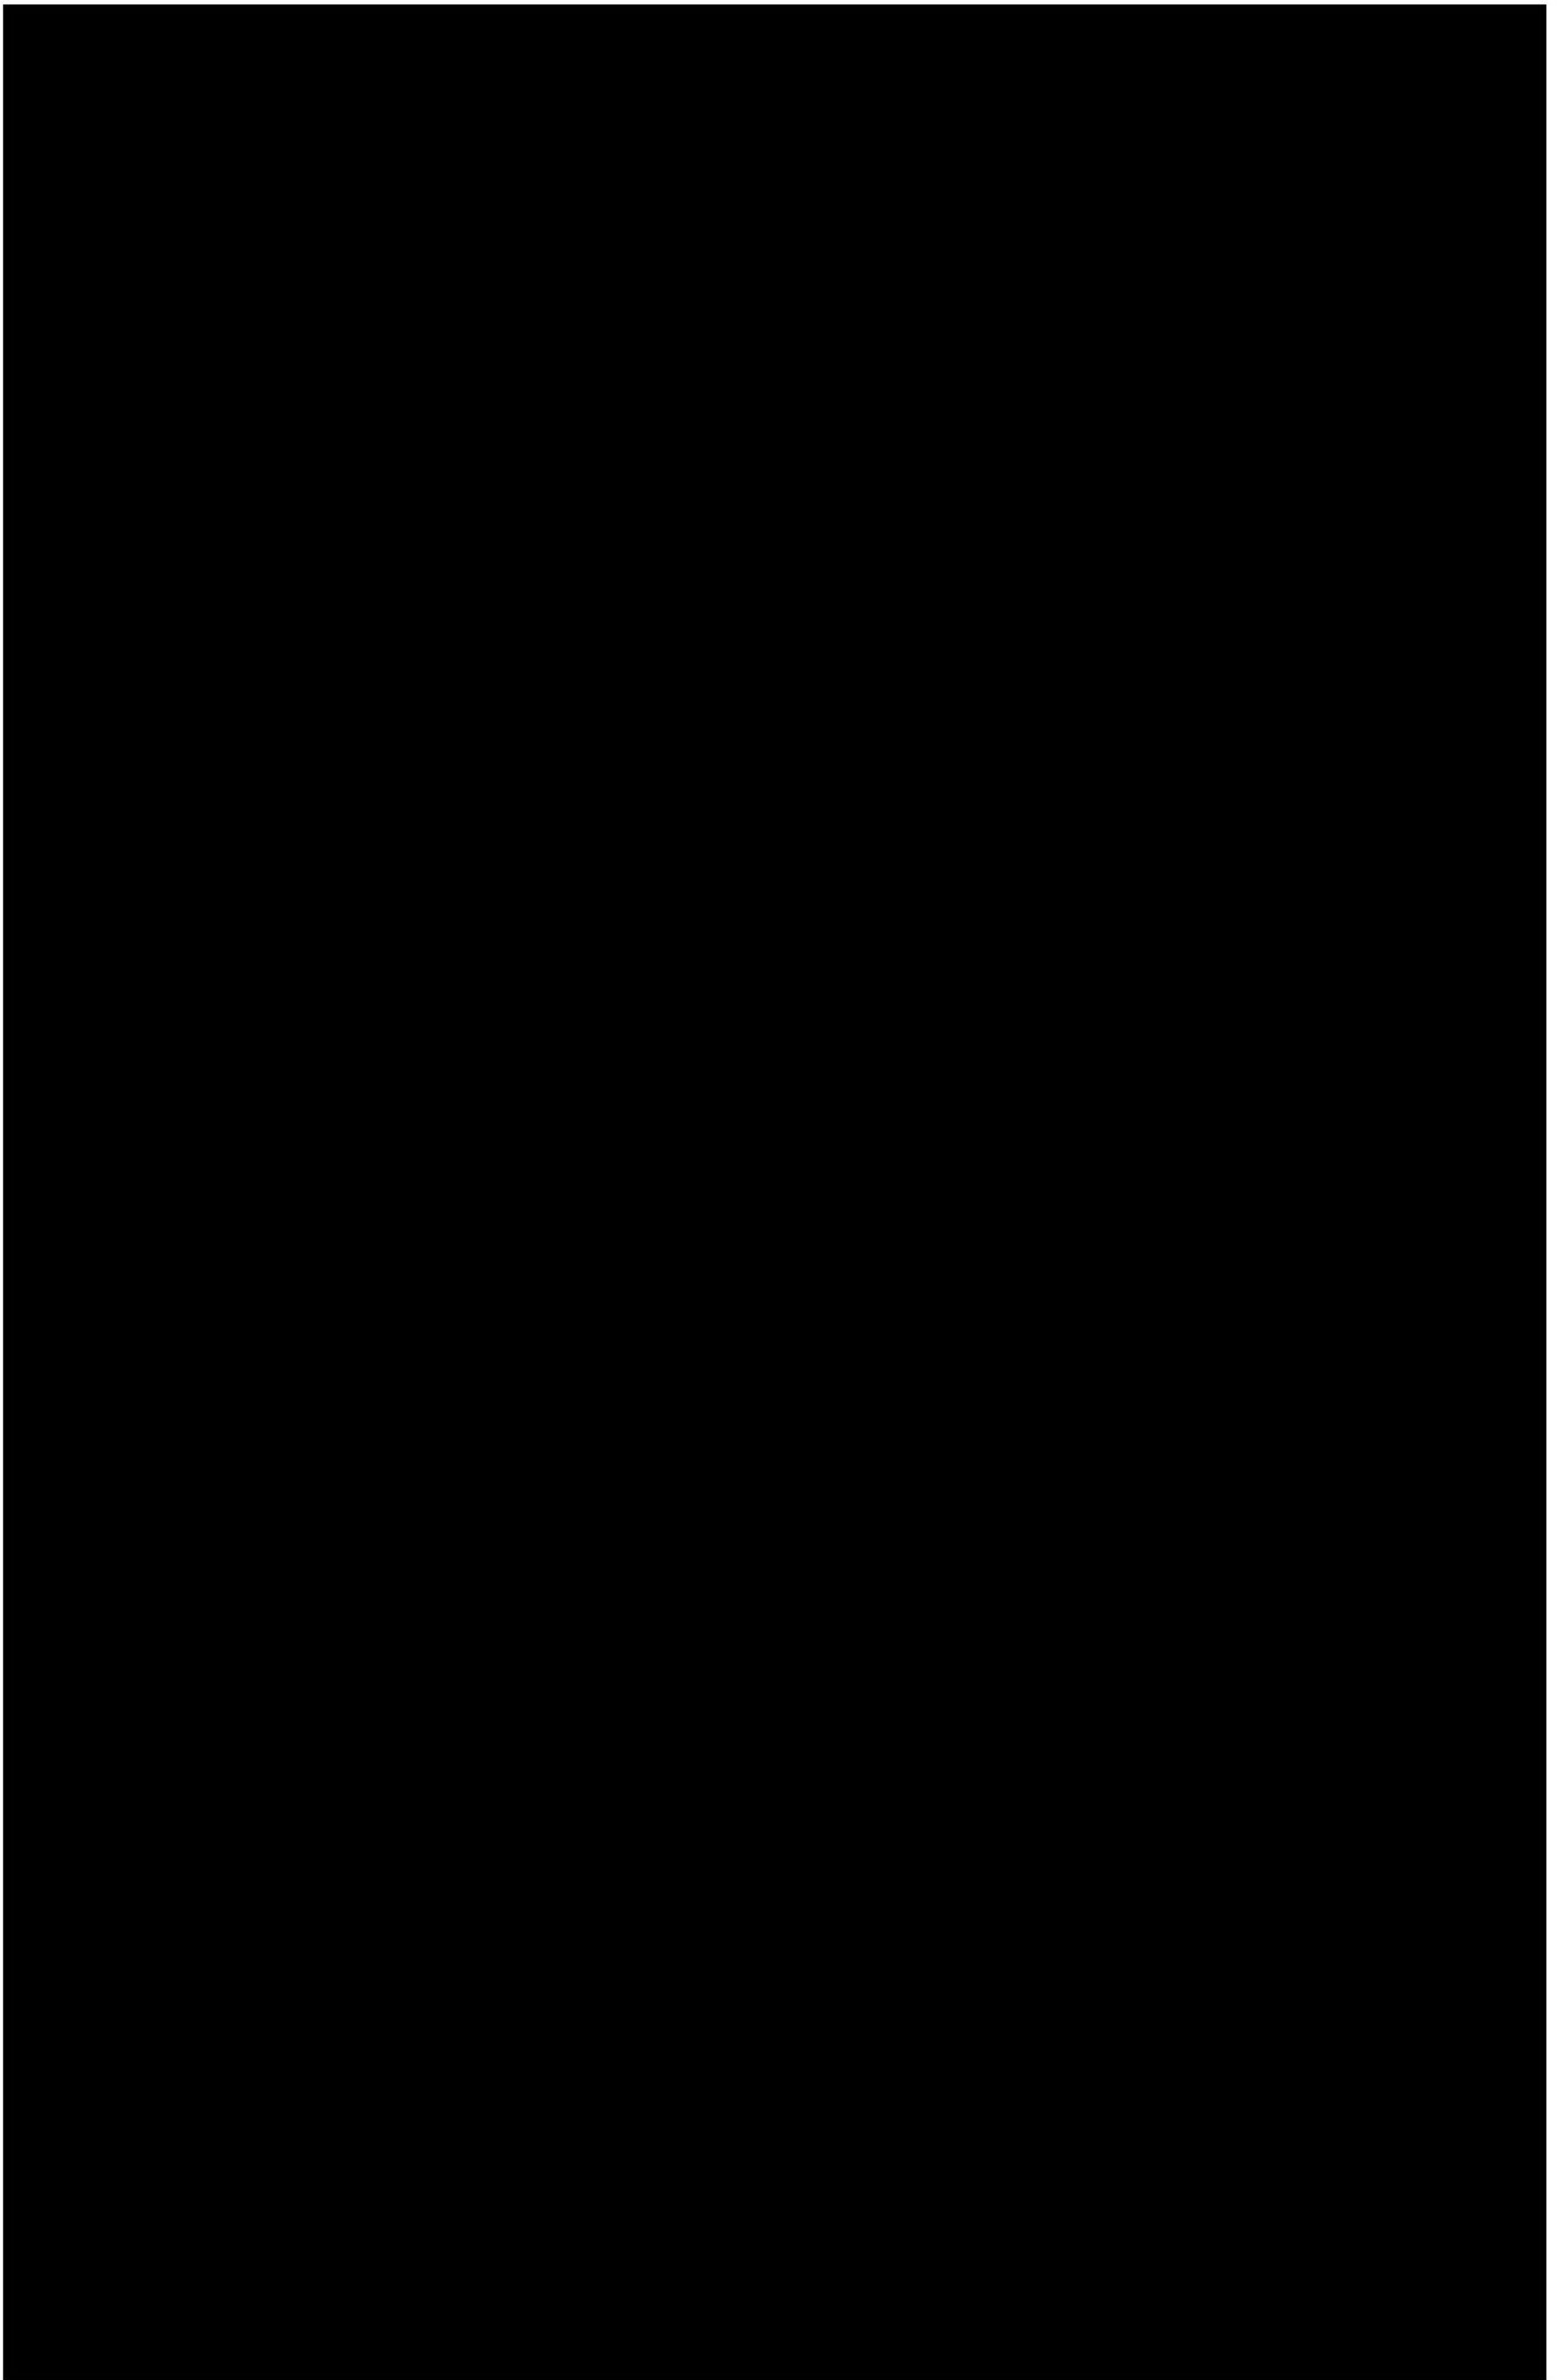

Regards

Mike Cash
