| 25/01/2021  | NM                | APP/2021/0032             | Steading At Ardoch, Crathie | Alterations to Steading Including Change of Use to Ancillary Accommodation - bats | My understanding is that the roof was removed/collapsed on this steading in its entirety. A new roof has since been built. The roof re-build does form part of this application (retrospective) but no further roof works will take place as they are complete. Further works are all internal. As such, no bat survey will be required. | CNPLDP 2015 Policy 4: Natural Heritage | JD                 |
