Comment: Strongly oppose to this ,being direct neighbours our garden is only Aprox 30ft long and very small in comparison to the plot it is being built on this will effect us hugely!! Not only is the extension very long compared to our plot it is also quite high , but n effect higher than our 6ft boundary fence
This will effect a huge amount of sunlight into our garden we don't get much as it is already .our son has a medical condition and need the sunlight he spends a lot of time in the garden in the summer as we all do and it will effect out quality time outside massively this will also create more damp to our house being in the shade more so .
We are set further back from this property and already feel boxed in as a higher fence has been erected to the front by the same residents
