### **New Single Garage:**

This single storey single garage with carport will be located to the side of our driveway and will mean that we will be able to park our cars away from the view from the road. Only a very small section of the garage will sit in front of the main house front elevation, this is only due to the fact that our property is set back from the road so much. You will not be able to see the garage from the main road as it is set back so far. We have high hedges that surround all sides of the garage location and it should not be at all visible for the neighbouring properties.
