All car wash chemicals used are manufactured by Nielsen and are biodegradable. Chemicals are diluted in a ration of up to 1:500 resulting in low chemical content in water run off. Main washing water is supplied from jet washers which deliver approximately 11 litres water per minute. Cars are washed for 3-4 minutes and therefore uses up to 44 litres of water per car. Anticipated cars washed is 30 per day therefore the operation will use approximately 1320 litres water per day. An average of 25 litres of water and diluted chemicals will fall to the floor where it will then drain into the silt trap and interceptor. Trade effluent will then travel to foul sewer through appropriate ACO drains and channels. Effluent disposal will be supported by a corresponding Trade Effluent License. Please refer to drawing ref. AS-1928\_XXXX CHQ Z07 GF PL-A-2005.
