Good afternoon,

Could I please speak to someone about this additional information request. I am a little confused.

1) The foot print is only slightly enlarged at the front of the existing garage- is there known contamination at this site? Presumably that was dealt with when the development was constructed so I do not understand your request.

2) The proposal is over 1m distant from the side boundary so again I do not understand your request.

3) I do not accept this as it is only part demolition of the roof and front elevation of the garage.

4) The distance is shown to the relevant side boundary at 1047mm - the distance to the rear boundary is as existing and the distance to the front boundary is not considered relevant, please advise.

I look forward to your response.

Kind regards,

Alison Stevens
