Dear Sirs,

**Flat 5, 55 Frazier Street, SE1 7FL**  
**Planning Application for AC Plant**

Please find attached our application for the installation of a single AC unit on the roof of the above to serve the top floor flat

The unit is to be installed on the flat roof away from the front edges to ensure it is not visible from the street.

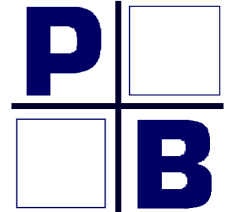

Access to the unit for service and maintenance will be through the skylights of the top floor flat.

An acoustic survey and analysis has been carried out by RPA Acoustics and their report is attached to this application. They have found the plant will operate within the allowed noise levels and does not require additional acoustic screening.

Yours faithfully

Ian de Peyrecave RIBA
