

Proposed Side Elevation

General Notes

Refer to Structural Engineer's information regarding the structural design and specification of alterations where required.

All temporary propping and structural work is to contractor design and/or in accordance with Structural Engineer input and recommendations.

For dimensions, refer to General Assembly Drawings. If any dimensions are in doubt, clarify with Architect prior to demolitions.

All dimensions must be checked on site and discrepancies verified with the Architect.

Door openings to be set out to give full specified architrave either side.

Any discrepancies between drawings to be reported immediately to the Architect.
