Drainage Connections

RECEIVED

07 DEC 2020

There is currently a foul water connection from the existing public house to to the road. With the demolition of the public house under approval 20/00972/FUL this connection will be reused if possible. If not acceptable then a new connection will be made to the sewer in the main road

There is currently no surface water sewer in the main road and surface water will therefore be made to soakaways within the site
