

Ref: SDNP/21/00291/HOUS

Proposed building of Garden Studio, 9A Vinson Road, Liss, GU337NE

## **Soil Management Plan**

- Foundations for the building will require excavation to a depth of 25cm. Half of this area is an existing vegetable plot, the other half is lawn.
- The soil type is sandy free draining soil. No subsoils will be affected. There are no flooding issues.
- The area of excavation will be 3.2m x 6.2m x 25cm, which equates to approximately 5m<sup>2</sup> of soil to be removed including turf.
- The soil will be moved to the grass verge at the front of the property to repair some large ruts created by parked cars, this will then be levelled and covered with the remaining lawn turf.
- 
- No soil or turf will be removed from the site.
- No additional excavation will be required to any other part of the garden.
