

Faux lead trough's positioned along the inside of the existing kerb line, in between the existing gully drains (leaving these clear). There is an Aco drain positioned to the front of the planters approx. 1m from the existing kerb line with tails connecting to the existing gully drains. Planting - to be discussed.

Ornamental tree planting & informal planting plus 3 faux lead troughs are to be installed here at the front of Bonty Courty

An island border 12m long x 5m at its widest point is to be created at the centre of the car park area. The border is edged with sawn & flamed top (and outer side) pink granite kerb stone 150x200x350mm. The border is to be planted with informal low growing shrubs and plants and edged with Buxus sempervirens to be maintained at 300mm high x 300mm wide. A receptacle for the annual Christmas tree is to be installed.

Faux lead planters & painted (Cherry red) bench seats are to be distributed along the front of the former Station Building
