

# **Design & Access Statement**

## **OLD RAM**

### Norfolk NR15 2DE

This Scheme has been proposed as there is an internal refurbishment planned and the current external signage goes not reflect this.

The existing signs would be removed where specified and the replacement signs installed to the same locations as shown on the drawing

Great care has been taken when designing the replacement signs in order to limit the impact on the building and surrounding area while maintaining the high standards of an Admiral Taverns establishment.

The proposal is as follows

#### **Item 01**

The existing header and gibbet will be removed from the post and a new double sided panel and gibbet installed. The panel will be illuminated from below by two low energy uprights angled to light the panel only. The panel will be constructed from aluminium as the existing panel

#### Item 01a & 01b

Two amenity board to be fitted back to back to the existing post constructed from aluminium with sign written display. The panels would be non illuminated and would eliminate the need for free standing A board as shown at present

#### Item 02

One set of replacement sign written letters and logo to the main gable wall. This would replace the existing and be non illuminated.

#### Item 03

One replacement decorative brass lantern to the same location as the existing. The current lantern is damaged and unrepairable.

#### Item 04

Two replacement post mounted car park directional signs with trough light illumination from below. These are like for like signs of the same size and location as the existing.

#### Item 05

One replacement post mounted car park directional sign to replace existing on a like for like basis

Overall we feel that the proposed scheme is a suitable replacement for the existing signs which are in need of replacement
