

## Image 1: View from back lawn Trewartha, to NW towards Black Adder

Only area where gap in vegetation carries risk of visual intrusion to residents of Black Adder (the adjacent house)

Proposed planting of two shrubs *Escallonia rubra* var *Macrantha* and *Olearia haastii*, in 2 & 3l pots. Both will grow to at least 1.5m high. (Standing in place here, but not yet planted)

500mm-high stone wall (under-construction) with vertical holes concreted in for galvanised fence supports (here, for illustration, just resting in place before permanent fixing). Fence to be 1.20m high, as per D&A statement. (The 1.2m fence tops the low wall which itself replicates the level change between lawns visible in photo 1 of DAS.) Fence to extend to right in this photograph, to garage.
