

Note:

The existing trees which border the site are all to be retained and unaffected by the proposal with the exception of one tree which is dangerous and immediately abuts the gate access. It would be counter productive to remove any of the established landscaping and work against the proposed privacy of the pods. All of the access track and respective pathways will be permeable.

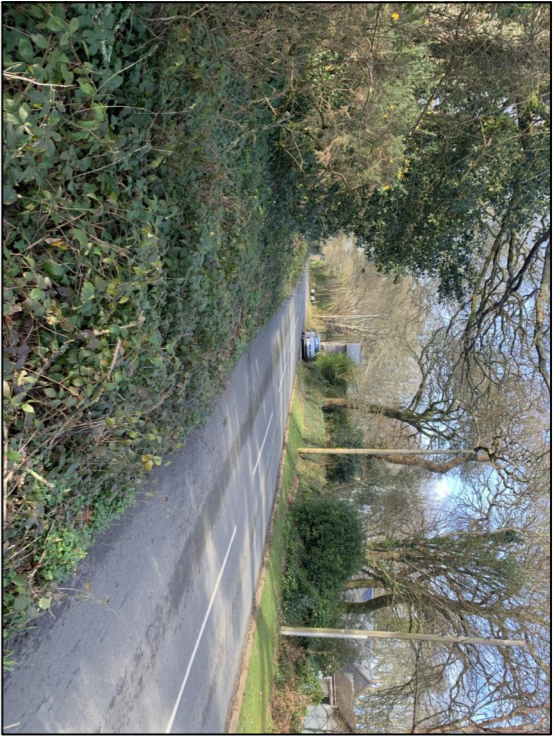

Existing gate access viewed from the road

View of the southern tree lined boundary looking from the gateway

View of the eastern boundary and the respective tree screening

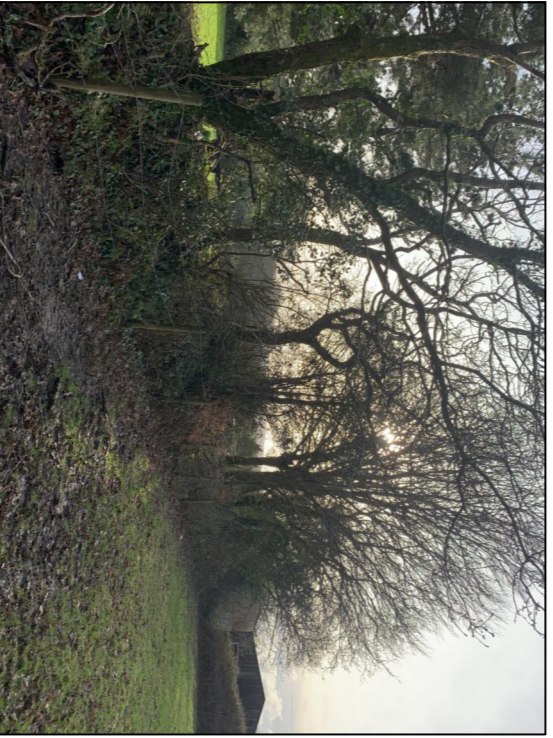

View from existing access set back 2.4m from road edge looking northwards up the road

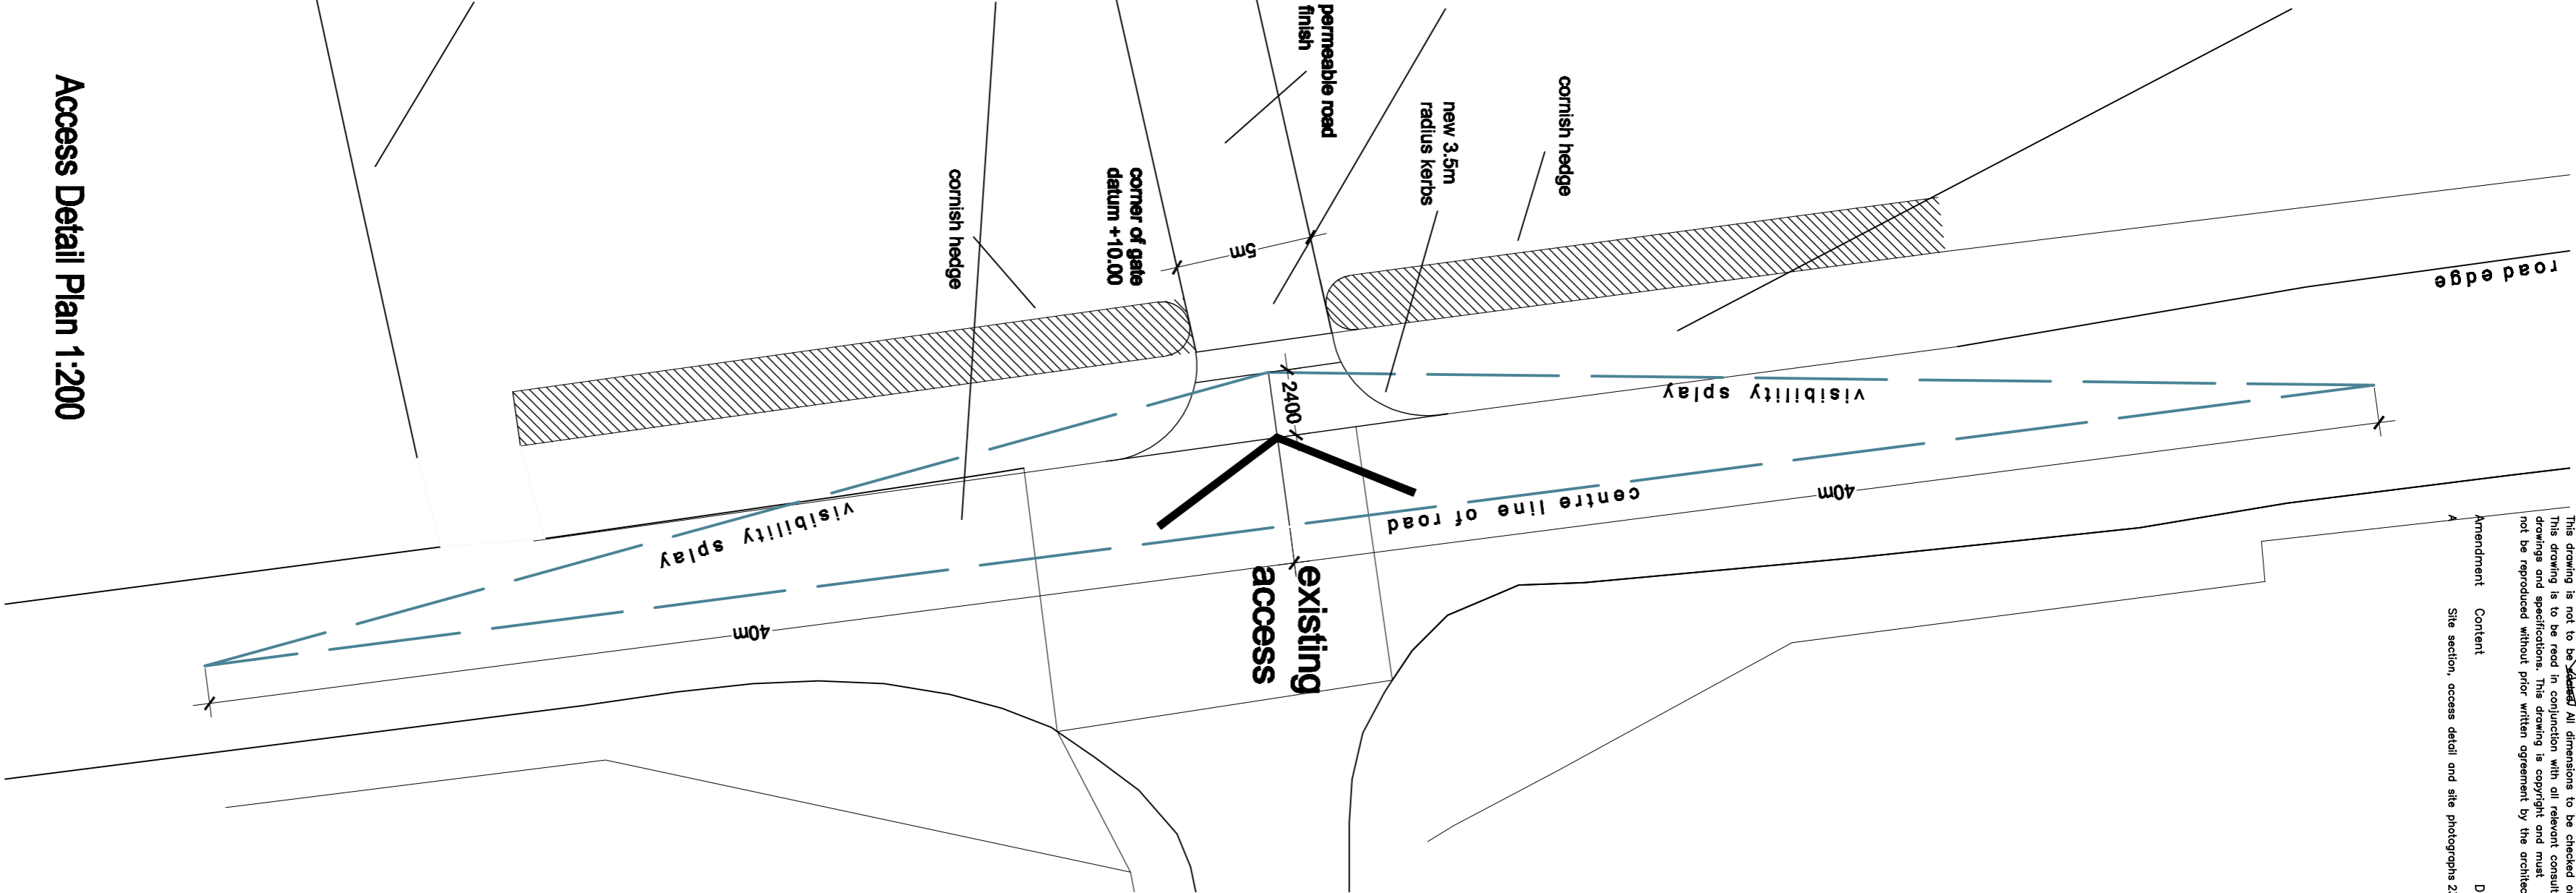

Existing gate access

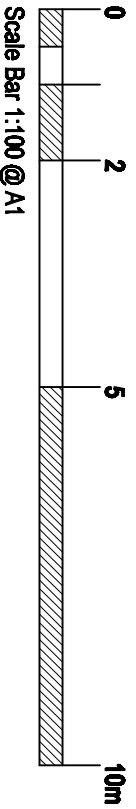

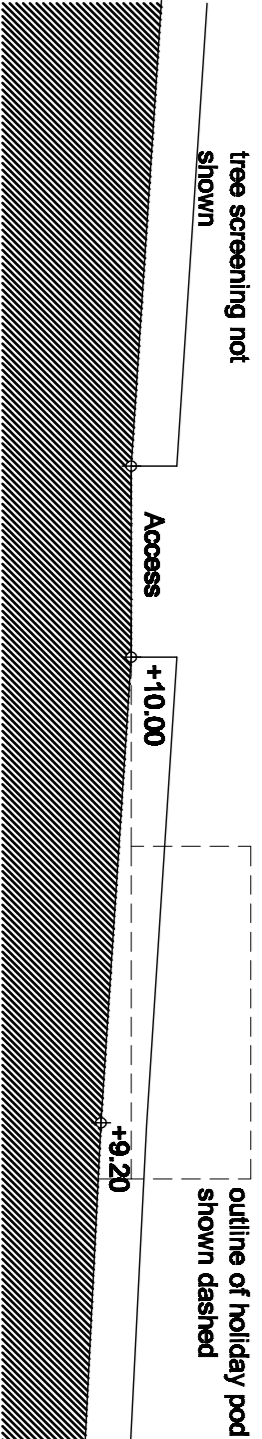

View from existing access set back 2.4m from road edge looking southwards down the road, note the 'Slow' signage in the road

View of southern boundary illustrating the tree screening with the existing agricultural shed in the background
