

Discharge of condition 4. (19/P/01208)

Roof:

- EPDM rubber roofing

Render (details of render are on the link when you click on it)

- They were looking for exceptional levels of thermal efficiency and a high quality, low maintenance finish therefore Silkolitt Supa was used. As a direct result of the **Silkolitt Supa system**, a U-value of $0.12\text{W/m}^2\text{k}$ has been achieved, creating comfortable all-year round living conditions for residents with minimal use of heating. This project received an INCA project of the year award.

Cladding (colour is specified in picture brunnea and show a picture of it)

- It is a high pressure, water based preservative **treatment** that is impregnated into the wood cladding and provides long term protection against insects, rot and fungal decay. It contains a pigment called “**Brunnea**”, a UV inhibitor that holds colour for a longer period of time and reduces the rate of weathering.

Windows & door

Enjoy uncompromised style and performance with the new flush window from AluK.

The 58BW Flush window combines minimal sightlines and maximum weather resistance with all the best features of the tried and trusted 58BW range: advanced performance, versatility and security.

A flawless, flush finish and slim sightlines makes this the perfect choice for contemporary new build and refurbishment projects. With a choice of slim sashes and a range of window configuration options, the 58BW Flush can be used to achieve a sleek, minimal aesthetic to suit any project.
