

EV Box Elvi Socketed – Wifi Enabled, kWh Meter

This premium quality EV Charge Point is produced by the Worlds leading EV Charge Point Manufacture. It is uniquely equipped to deliver charging capacity from 3.7kW to 22kW at a single or 3 phase power supply all from this one device. This unique product is durable, smart and simple in design, tracks and manages charging sessions, is easy to use and compatible with every electric vehicle now and in the future

Upgradable, future-proof

EVBox Elvi evolves with every electric car, now and in the future. Thanks to its “click-on” features and modular design, Elvi adapts with a simple upgrade of the charging cable and charging capacity.

Modular, low-maintenance

EVBox Elvis modular design comes with just three components: the wall dock, the station, and the cable. Once the wall dock is installed by an electrician, you can simply click the station and cable into place to start charging, or unlock the station yourself to send in for maintenance.

Intelligent, efficient

EVBox Elvi is more than just a charging station. It connects with the Hey EVBox charging management platform to provide you with charging session insights, as well as the EVBox Smart Charging add-on to automatically adjust power consumption in real-time.

Key Features :This has it all....

- **Mode 3 Fast Charging**
- **Tethered Lead Type 1 or Type 2**
- **Built in LED charging status display**
- **Smart Enabled**
- **6mA DC detection device**
- **Weather Proofed to IP55 Rated**
- **Dynamic Load Balancing,**
- **Solar Integration**

- **Scheduled Charging Sessions**
- **WIFI enabled**
- **BlueTooth**
- **Simm card built in – FREE TO USE**
- **3 Year Warranty**
- **OCPP 1.5/1.6**
- **RFID enabled**
