LANDSCAPE BUILDERS.co.uk

1. **Fagus sylvatica (beech).**
Sever ivy at base if required. Remove dead wood.
Raise crown to 5m from ground level to increase light.
2. **Fagus sylvatica (beech).**
Previously felled.
3. **Fagus sylvatica (beech).**
Previously felled.
4. **Fagus sylvatica (beech).**
Sever ivy at base if required. Remove dead wood.
Raise crown to 5m from ground level to increase light.
5. **Fagus sylvatica (beech).**
Previously felled.
6. **Fagus sylvatica (beech).**
Sever ivy at base if required. Remove dead wood.
Raise crown to 5m from ground level to increase light.
7. **Fagus sylvatica (beech).**
Over extended North/Eastern limb with heavy lean: reduce height of tree by 5m and side laterals by 3m to reduce load/windsail, particularly on fork. Sever ivy at base. Remove dead wood.
Raise crown to 5m from ground level to increase light.
8. **Fagus sylvatica (beech).**
Sever ivy at base if required. Remove dead wood.
Raise crown to 5m from ground level to increase light.
9. **Fagus sylvatica (beech).**
Sever ivy at base if required. Remove dead wood.
Raise crown to 5m from ground level to increase light.
10. **Fagus sylvatica (beech).**
Sever ivy at base if required. Remove dead wood.
Raise crown to 5m from ground level to increase light.
11. **Fagus sylvatica (beech).**
Sever ivy at base. Raise crown to 6m from ground level, leaving lower, inner growth on field side up to 3m. Remove dead wood.
Raise crown to 5m from ground level to increase light.
12. **Fagus sylvatica (beech).**
Sever ivy at base if required. Remove dead wood. Raise crown to 5m from ground level to increase light.
13. **Fagus sylvatica (beech).**
Sever ivy at base if required. Remove dead wood.
Raise crown to 5m from ground level to increase light.
