1. INTRODUCTION

- 1.1 This Transport Statement (TS) has been prepared by Paul Basham Associates on behalf of Griffon Hoverwork to support a planning application for the construction of a temporary building at the Hovercraft Terminal, Southsea.
- 1.2 The Hovercraft Terminal is located within Southsea seafront on Clarence Esplanade, approximately 1.6km to the south west of Portsmouth City Centre. The site currently comprises an existing terminal building known as 'HoverTravel- Portsmouth', with a ticket office and reception, toilets, a customer waiting area and an open roofed cycle store. The hovercraft terminal location is shown below in **Figure 1**.

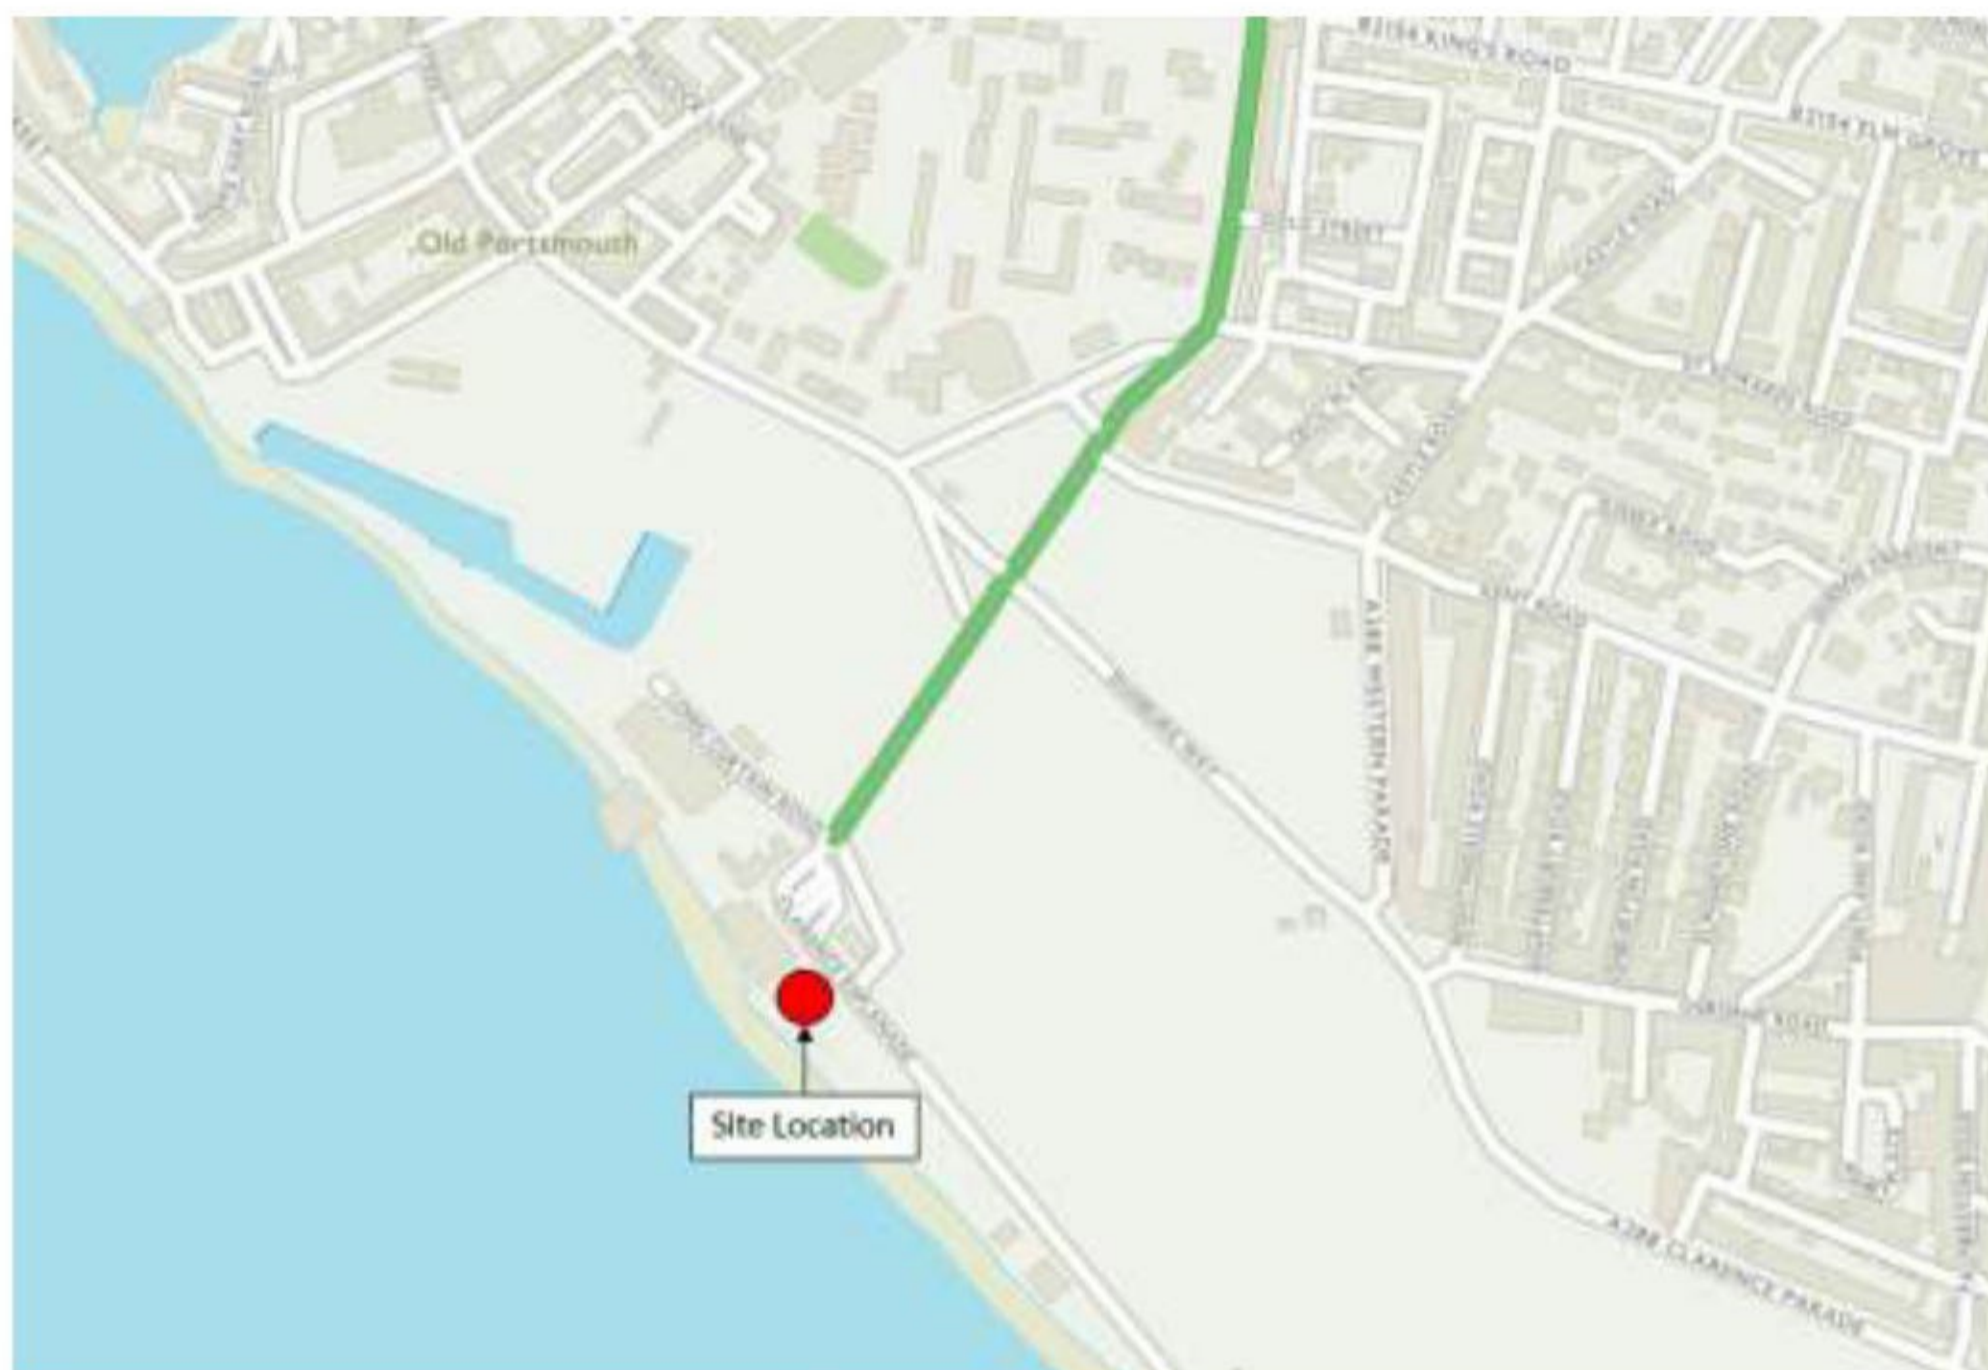

Figure 1: Site Location

- 1.3 This TS has been prepared to support a planning application for the construction of a temporary building. This would be located to the rear of the existing terminal building and would comprise a kitchenette, staff toilets and office space. The location of the proposed temporary building is shown in **Appendix A**.
- 1.4 To support this application this TS will discuss site accessibility, development proposals, parking arrangements, trip generation and highway impact before drawing conclusions.

2. SITE ACCESSIBILITY

- 2.1 As previously described the HoverTravel terminal is located along Southsea seafront on Clarence Esplanade. The existing site comprises the ferry terminal building which is bordered by Southsea beach to the west, The Solent to the south, eateries and tourist uses to the east and Clarence Esplanade to the north. At present there is no vehicular access into the site, with site staff and customers able to access the site from the Clarence Esplanade footways which measures circa 7.5m in width outside the site frontage.
- 2.2 The site is located in a tourist location which is in close proximity to existing residential development within Old Portsmouth and Southsea. As a tourist and commuter location (for those traveling to the Isle of Wight) the area surrounding the site is well connected by attractive and well-established pedestrian, cycle, and public transport infrastructure.
- 2.3 To the west of the site a number of amenities and services are provided along Clarence Esplanade including eateries, sea front arcades, the Clarence Pier bus stops and a fairground. To the north of the site public toilets are accessible in addition to The Esplanade Car Park.

Local Road and Pedestrian network

- 2.4 Clarence Esplanade runs east to west and provides access to services and attractions at Southsea seafront. Clarence Esplanade measures c.7.5m in width (excluding the parking and loading bays) and is subject to a 30mph speed limit.
- 2.5 A number of Traffic Regulation Orders are in place on Clarence Esplanade including double and single yellow lines, keep clear markings, taxi ranks and loading bays. The nearest loading bay is provided to the east of the site on Clarence Esplanade.
- 2.6 Clarence Esplanade connects to the Long Curtain Road/Pier Road/ Clarence Esplanade roundabout via two arms, one of which provides an 'in' only arrangement. The one-way section of Clarence Esplanade provides connection into The Esplanade Car Park and forms a junction onto Clarence Esplanade adjacent to the site. Clarence Esplanade supports two-way vehicle movement outside the site frontage. As a result of the road layout two islands are created which provide the Clarence Pier bus stops supported by hardstanding and public toilets. The layout of the carriageway is shown in **Figure 2**.

Figure 2: Road Layout on Clarence Esplanade

2.7 In the site vicinity Clarence Esplanade benefits from footways on both sides of the carriageway. These measure a minimum of c.2.5m in width and are supported by a number of dropped kerb crossings. The footways on Clarence Esplanade provide connection to footpaths through Southsea Common and onto pedestrian infrastructure on the wider highway network.

Local Cycle Network

2.8 The site is well located to Portsmouth's extensive cycle network which offers on and off-road routes as well as connection onto National Cycle Network Route 2. National Cycle Network Route 2 runs along Duisburg Way c.320m to the north of the site and connects to Eastney to the east and Gunwharf Quays, the Gosport ferry terminal, The Hard Interchange and Portsmouth Harbour Train Station to the west. From the site a number of other local routes are available which connect to the surrounding residential areas within Old Portsmouth, Southsea and Fratton, and although no formal route is provided for cyclists along Clarence Esplanade the carriageway of sufficient width to facilitate on-road cycling. The local cycle network surrounding the site is shown in **Figure 3**.

Figure 3: Local Cycle Network

2.9 It is therefore considered to be reasonable and attractive for both site users and staff to cycle when assessing the site, particularly if travelling from other areas of Portsmouth, Gosport or the Isle of Wight.

Local Bus Network

2.10 There are a number of high-quality bus stops available along Clarence Esplanade. The closest bus stop is accessible immediately outside the existing ferry terminal with a further 4 bus stops accessible within a minute walk of the site to the west. From the bus stops within close proximity to the site the Hoverbus bus service is accessible. This service provides a connection between the hovercraft terminal, The Hard Interchange/Gunwharf Quays, Commercial Road and Portsmouth & Southsea Train Station.

2.11 In addition to this the number 23 and 25 bus services are accessible on Duisburg Way within a 5 minute walking distance. The 23 bus service operates between Southsea and Leigh Park and the 25 bus service operates from Eastney to Portsmouth. Bus services within the site vicinity are summarised in **Table 1**.

Service	Route	Timetable		
		Monday- Friday	Saturday	Sundays and Bank Holidays
Hoverbus	Hovercraft terminal, The Hard Interchange/Gunwharf Quays, Commercial Road and Portsmouth & Southsea Train Station.	Every 30 minutes First bus 06:26 Last bus: 20:42	Every 30 minutes First bus 08:26 Last bus: 20:42	Every 30 minutes First bus 08:26 Last bus: 20:42
23	Southsea and Leigh Park	Every 10 minutes First bus: 05:10 Last bus: 00:29	Every 15-20 minutes First bus: 06:17 Last bus: 00:29	Every 15-20 minutes First bus: 06:34 Last bus: 00:05
25	Eastney to Portsmouth	Every hour First bus: 07:00 Last bus: 17:38	Every hour First bus: 07:00 Last bus: 17:38	Every hour First bus: 09:00 Last bus: 17:48

Table 1: Bus Services

2.12 A wider array of bus connections are available from the Hard Interchange (circa 6 minute bus journey) and Commercial Road (circa 13 minute bus journey) on the Hoverbus service.

2.13 Timetables from local bus stops are included in **Appendix B**.

Local Rail Network

2.14 The nearest rail station to the site is Portsmouth Harbour, which is accessible in a 23 minute walk, 8 minute cycle or 6 minute bus journey. Alternatively, Portsmouth & Southsea rail station is accessible via a 23 minute walk, 11 minute cycle or 10 minute bus journey. It is pertinent to note that, although it is longer to travel by cycle or bus to Portsmouth & Southsea Station than it is to travel to Portsmouth Harbour Station, due to more direct pedestrian only connections the journey time is the same when travelling on foot.

2.15 From Portsmouth Harbour and Portsmouth & Southsea rail station services to destinations including London Waterloo, Littlehampton, Cardiff Central, Brighton and London Victoria are available. Local train services are therefore an attractive mode of transport for local commuters.

Pay and Display Parking

2.16 There are a number of pay and display car parks and parking areas within close proximity to the site. The closest car park to the site is The Esplanade Car Park which provides 380 parking spaces (including 7 disabled spaces). Charges at this car park apply 24 hours, seven days a week including bank holidays. Season tickets are available to purchase from Hovertravel making this an attractive option for site staff.

2.17 In addition to this echelon pay and display parking space are available on Clarence Esplanade, with parking charges implemented between 08:00-18:00. The Clarence Pier Car Park is also accessible within a short walk of the site however this car park is currently closed for sea defence work.

Personal Injury Accident Data

2.18 To understand the existing safety conditions on the surrounding highway network Personal Injury Accident data has been obtained for a period of 5 years (from 2015-2019). This indicates that there have been no accidents across the site frontage, however, there have been one serious and two slight accidents on Clarence Esplanade, with a serious accident also on Pier Road to the north of the site. These accidents occurred in different years and given the high volumes of vehicles and pedestrians/cyclists on Clarence Esplanade do not indicate an existing accident trend that would be exacerbated by this application.

2.19 The PIA data is shown in **Figure 4**.

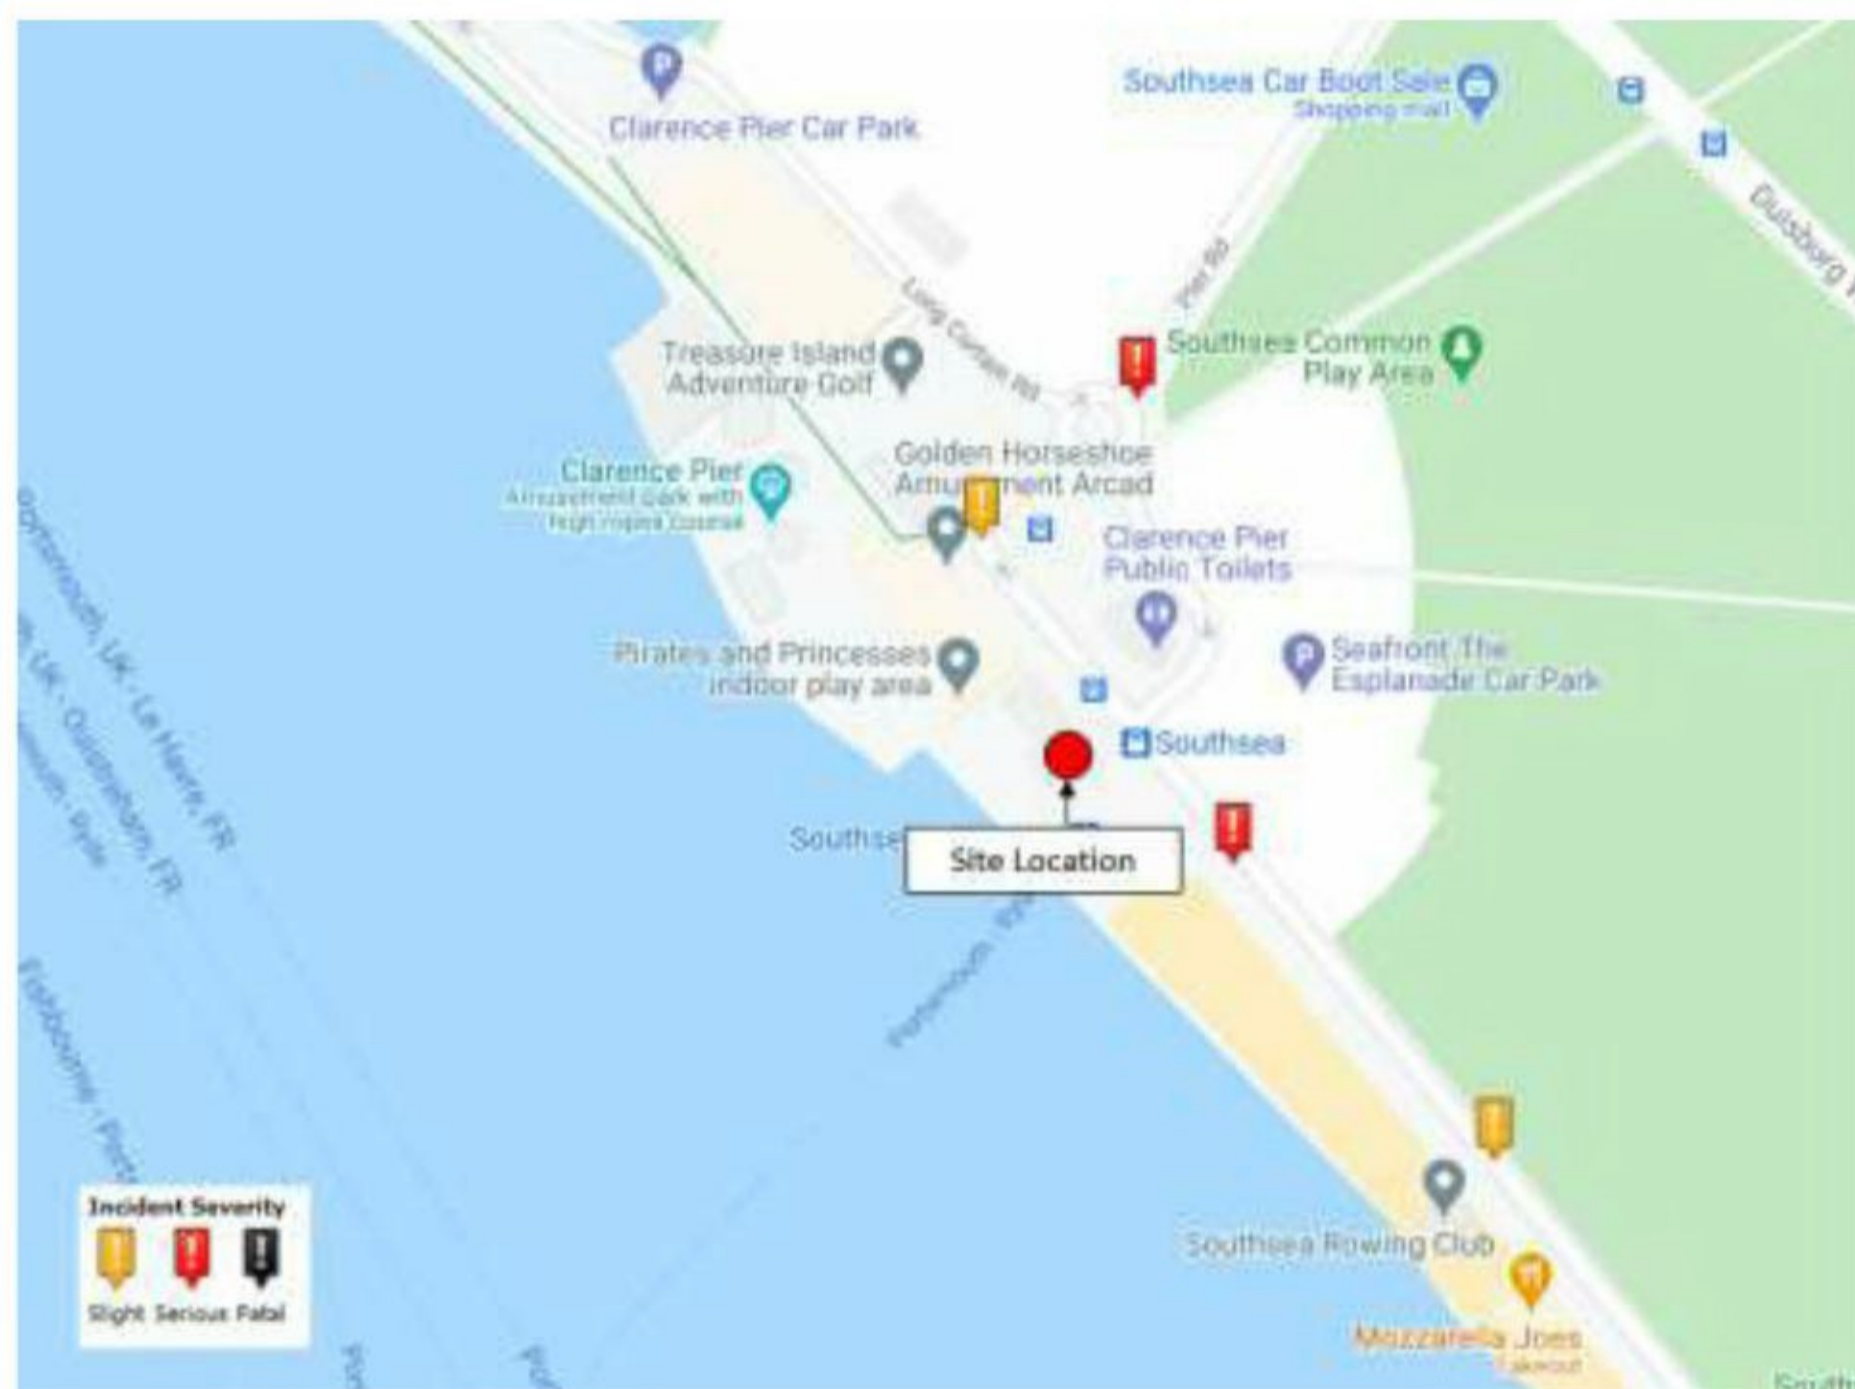

Figure 4: Personal Injury Accident Data

3. DEVELOPMENT PROPOSALS

- 3.1 The application proposes the development of a temporary building. This would be located to the rear of the existing terminal building as shown in **Appendix A**. Within the building further amenities would be provided for staff including a kitchenette, office space and toilets. It is proposed that the building would be in place for up to 7 years and a minimum of 5 years. After this period, the site would revert to the existing conditions.
- 3.2 The temporary building would be provided to enable capacity pending the commencement of the wider Portsmouth City Council seafront proposals. The building would enable the company to brief potential hovercraft clients from across the world physically on the site.

Staff Numbers and Site Operation

- 3.3 No changes to the terminals' operation are proposed as part of this application.
- 3.4 The building would generate demand for between 6-10 full time members of staff. The new staff members travelling to site are being relocated from the existing offices in Merlin Quay and will continue to be retained at the end of the temporary period. Routinely 4 to 6 staff would be at this office, increasing occasionally when briefing clients.

Access Arrangements

- 3.5 The siting of the temporary building would not impact on the site's existing access arrangements. Pedestrian access into the ferry terminal would continue to be from Clarence Esplanade, with no vehicular access provided into the site.

Servicing Arrangements

- 3.6 The site's servicing arrangements would also continue as per the existing arrangements.

Parking Provision

- 3.7 At present no parking is available on-site and existing staff members are encouraged to travel sustainability given the high quality and attractive infrastructure in place surrounding the site. An attractive and secure cycle store is also available to site staff and would be available to the new staff members.
- 3.8 No amendments to the existing car parking arrangements are proposed as part of this application.

3.9 Existing staff members who are unable to travel sustainably utilise season tickets (purchased from the terminal) for the Clarence Esplanade car park. It is likely that if new staff members associated with the building would utilise this existing arrangement if they are unable to travel sustainably. This is considered to be acceptable given that this is the existing arrangement for site staff parking and that the impact on surrounding parking areas would be minimal given the attractiveness of sustainable travel modes.

Trip Generation and Highway Impact

3.10 As a worst case this application would result in the addition of 10 staff members accessing the site by car. This would therefore result in the addition of 20 trips onto the surrounding highway network. Given the nature of the surrounding highway network and that this is subject to high volumes of traffic it is not considered that the addition of 20 trips would have a notable impact on highway safety or capacity.

3.11 It should be noted that the above trip generation is a robust, worst-case assumption totalling 20 additional daily vehicular trips. The Institution of Highways and Transportation's (IHT) document 'Providing for Journeys on Foot' identifies a maximum preferred walking distance of 2km for commuting. Therefore, given that given that the vast majority of Southsea's residential areas are located within 2km of the site, it is anticipated that a large proportion of staff will travel to and from the site on foot.

4. SUMMARY AND CONCLUSIONS

- 4.1 This TS has been prepared on behalf of Griffon Hoverwork to support a planning application of the temporary placement of a building at the Hovercraft Terminal, Southsea.
- 4.2 The site is located in a highly accessible location along Southsea sea front approximately 1.6km to the south west of Portsmouth City Centre. The site is well supported by pedestrian and cycle infrastructure with several attractive routes available that connect to the surrounding residential areas and key commuter locations. A number of regular bus services are also accessible which connect to key areas within Portsmouth. It is therefore considered to be attractive for site staff and visitors to travel via sustainable modes.
- 4.3 It is proposed that the building would be placed to the rear of the existing terminal building. This would provide amenities for staff including a kitchenette, toilets, and office space. This building would be in place for a maximum of 7 years. As part of the proposals up to 10 new members of staff would visit the site.
- 4.4 The implementation of the building would not have an impact on existing access, servicing, or parking arrangements.
- 4.5 At present no parking is available on-site and if needed staff members can purchase season tickets for The Esplanade Car Park. If new members of staff are unable to travel to the site sustainably, they would utilise this existing arrangement. It should however be noted that sustainable travel practices are encouraged to staff and that travelling sustainably (i.e walking, cycling and public transport) would be very attractive to staff members given the existing infrastructure in place.
- 4.6 As a worst case the application would result in the addition of 10 staff members accessing the site by car, equating to a total of 20 additional trips onto the network. Given the nature of the surrounding highway network it is not considered that the addition of 20 trips would have a notable impact on highway safety or capacity.
- 4.7 This TS has demonstrated that the proposals would not have a significant impact on the surrounding highway network. We would therefore encourage Portsmouth City Council to look favourably on this application regarding highways.
