

10 Riverland

Heritage Statement

The proposed Dwelling is in the Bishopsworth and Malago conservation area. The Extension will have the same brick finish as the dwellings around, using the same tiled finished roof, to make it in keeping with the area. The Extension will use the same white UPVC finish on the Exterior doors and windows. This way the building will have very little impacted on the area. The materials chosen for this proposal are appropriate for the area. The built form of the proposed building is exactly the same as the existing.
