

Hi Euan,

I wanted to attach some pictures to demonstrate to you why us as residents strongly object to the developer being able to occupy the flats prior to completion of the development. We have been living in a building site with scaffolding outside our windows for nearly 3 years with hardly any progress and since the developer has already occupied the new flats prior to your agreement works have stopped.

It is quite frankly disgusting that we are being subjected to this quality of living standards which is only going to continue should the variation to the application be permitted.

I appreciate COVID isn't helping matters but I'd strongly recommend a planning enforcement officer attends site to see the state of it with no end in sight. In addition we do not have adequate refuse or parking to cater for the already occupied flats, illegally.

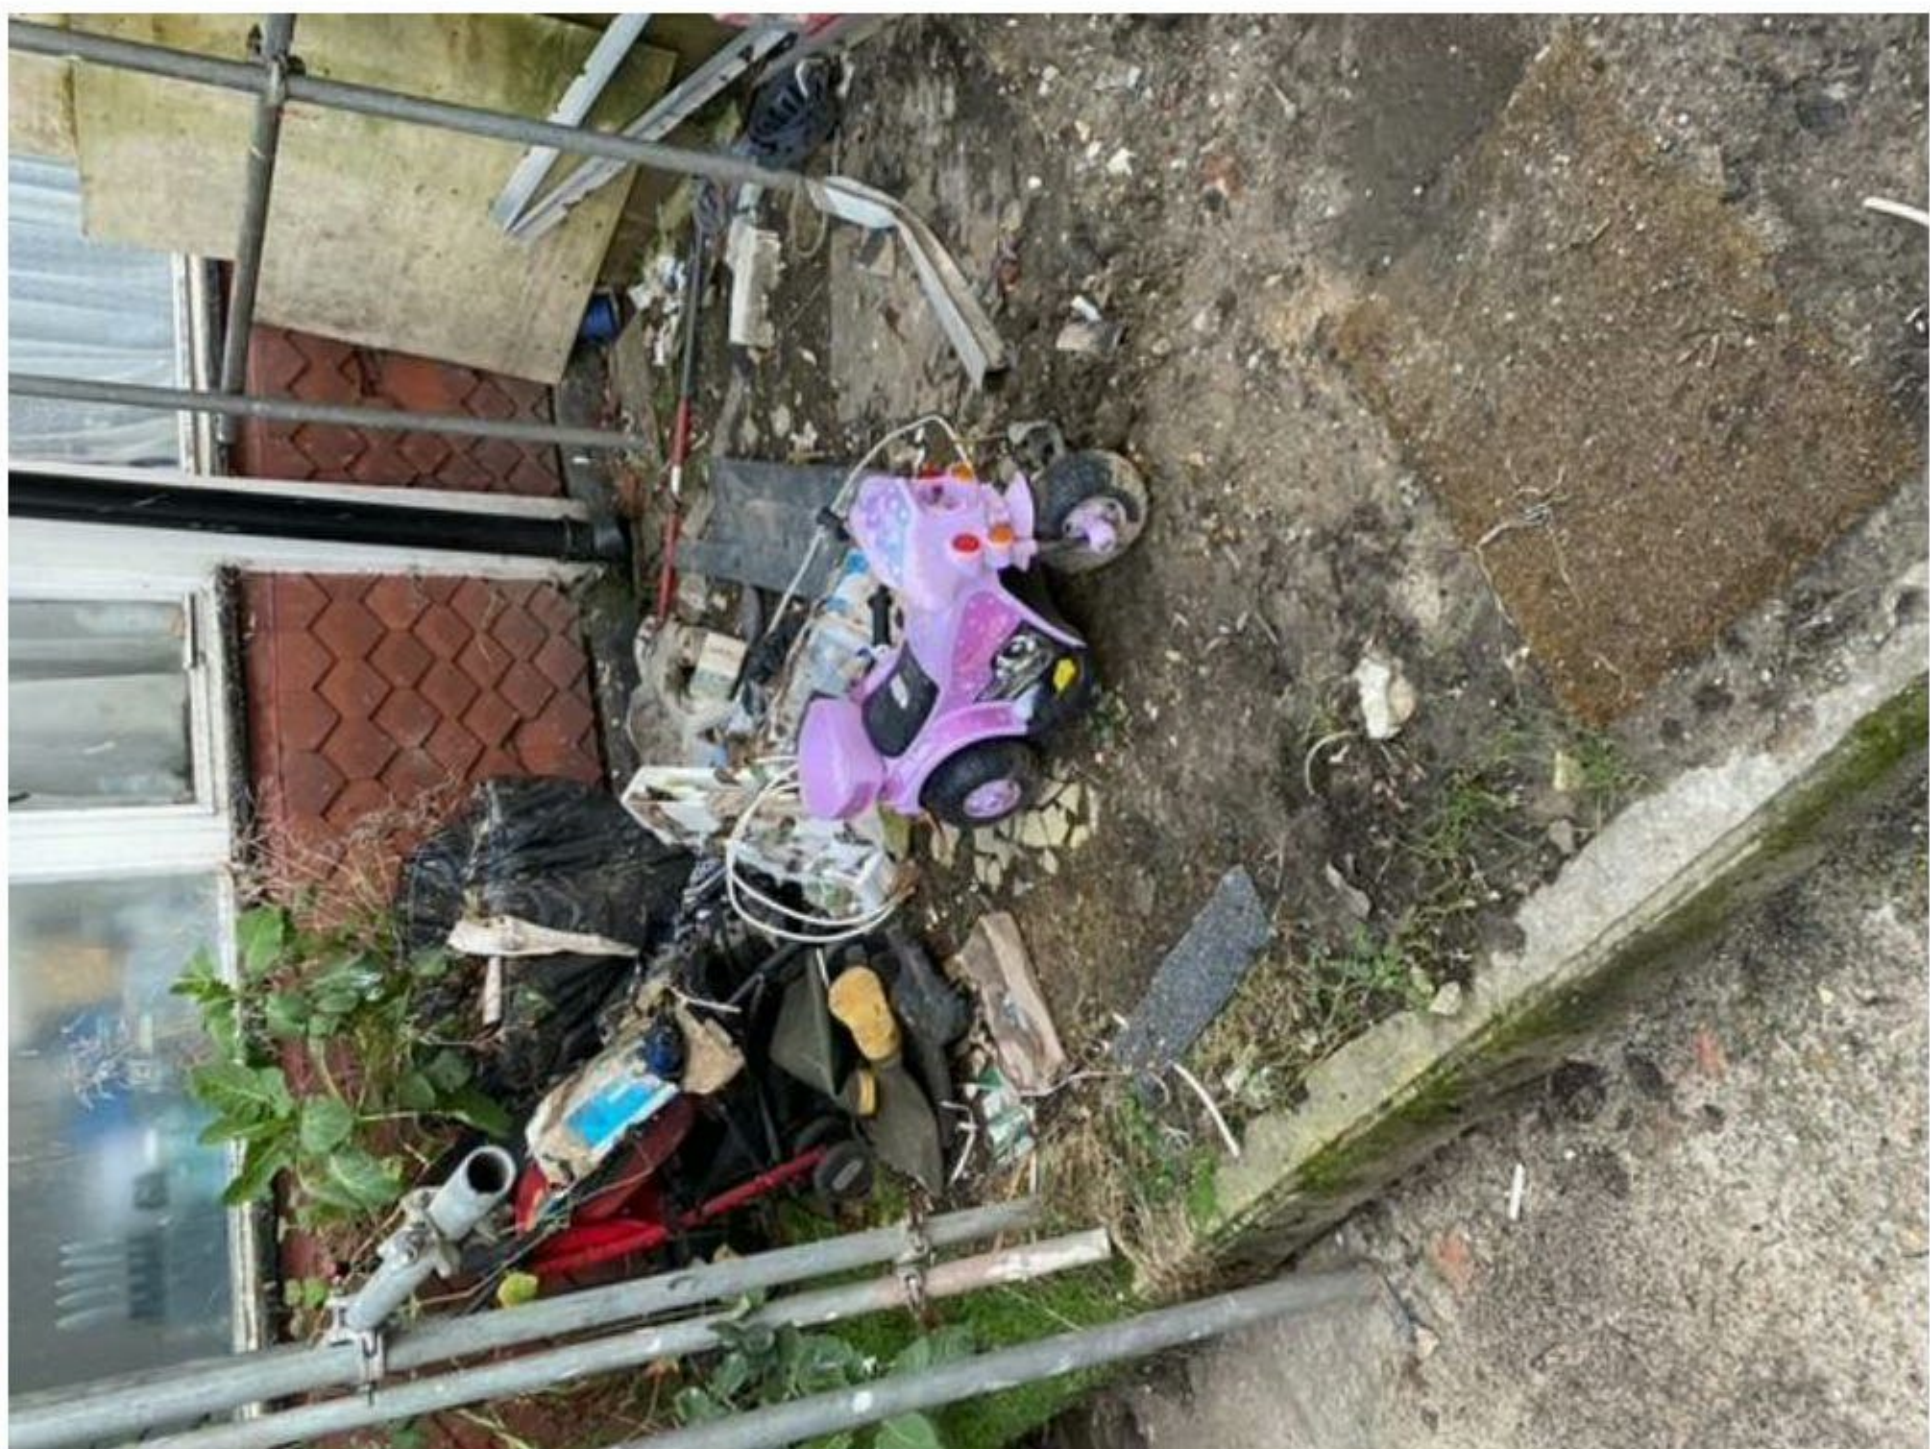

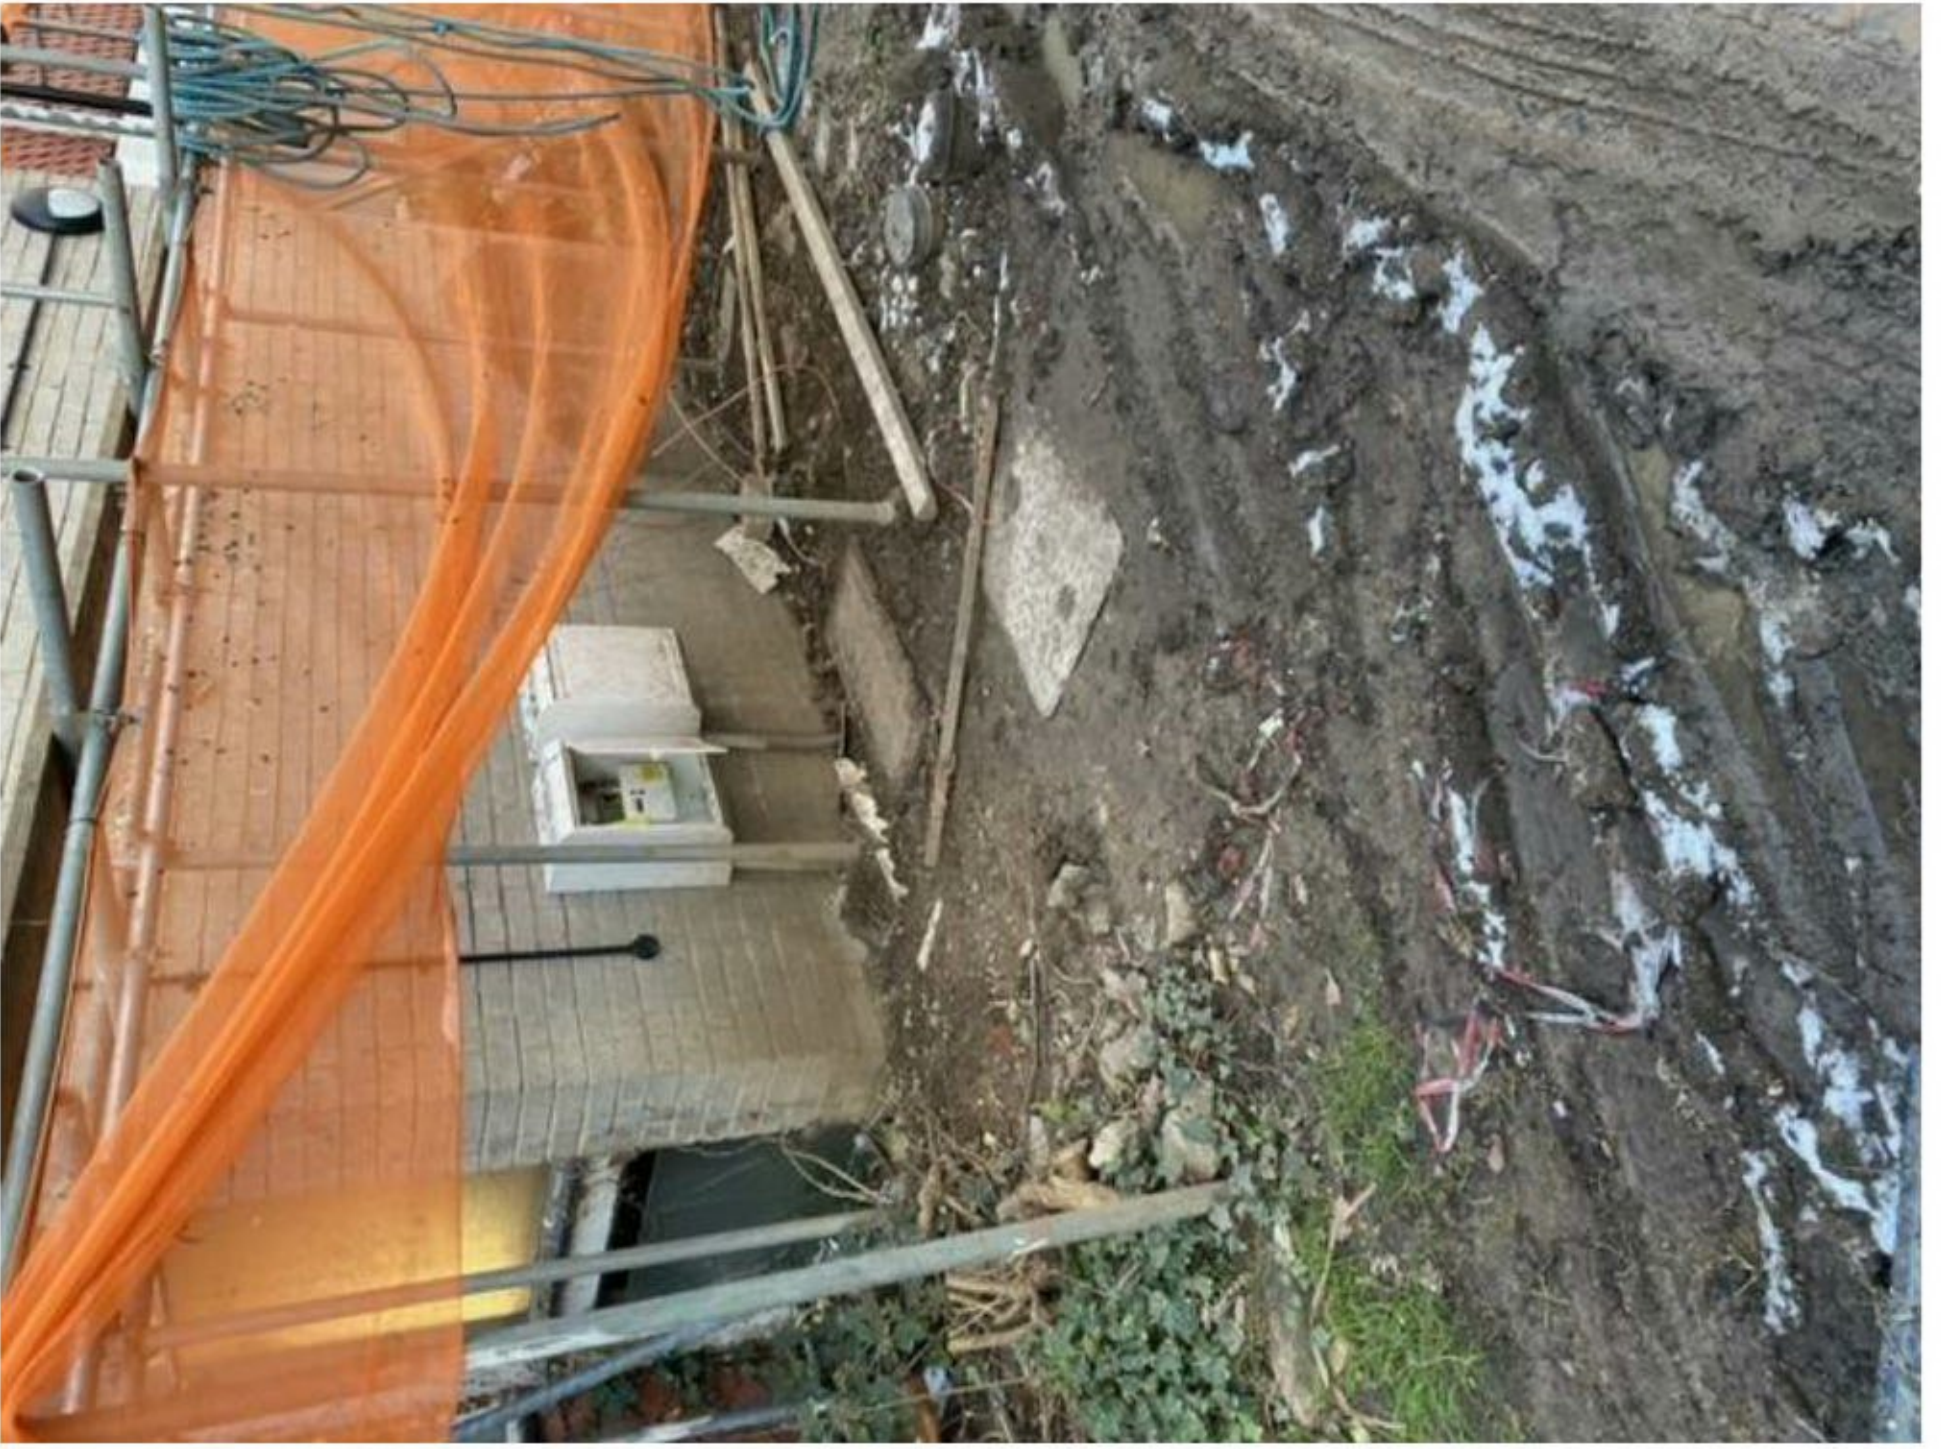

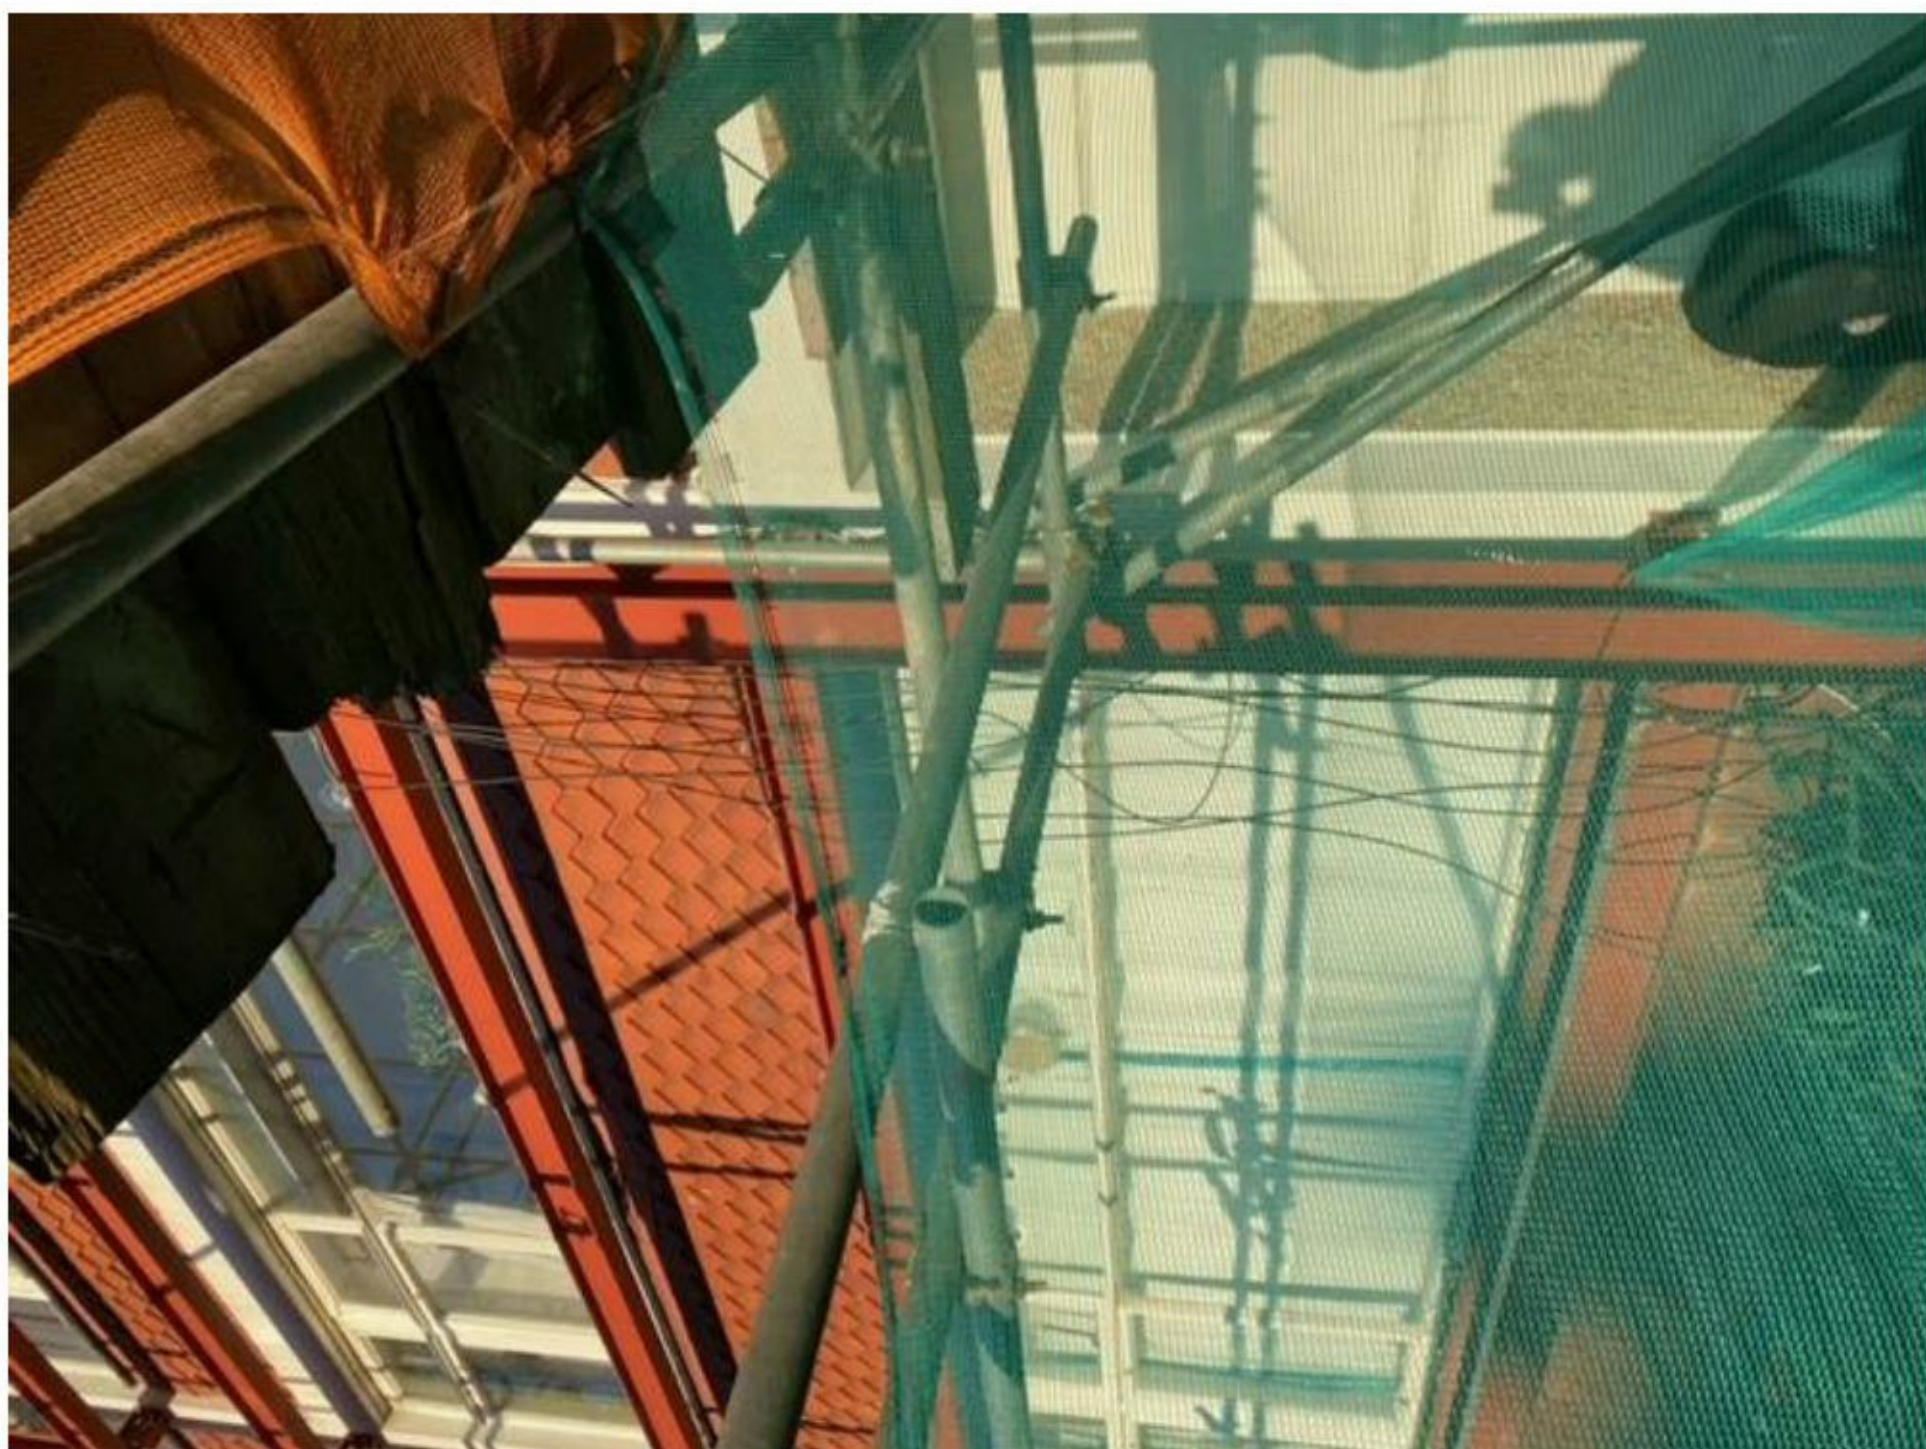

Thanks

Becky (no.28)
