

Installation on the corner of Quarry Hollow.

I'm aware some people believe that the risks of 5G are not more than those of using cell phones. However, while cell phone use is dependant in each individual's preferences, the installation would pose an unavoidable risk to everyone living near it.

As you may already know, 414 scientists and medical doctors have signed an appeal calling for a halt in the rollout of 5G due to its serious potential health effects including "cancer risk, cellular stress, increase in harmful free radicals, genetic damages, structural and functional changes of the reproductive system, learning and memory deficits, neurological disorders, and negative impacts on general well-being in humans"

Given this, I'm extremely concerned that the installation will have a serious adverse effect on my, my family's, and the neighbourhood's health, as well as that of the diverse wildlife that we have in this area due to the proximity of Shotover Country Park and the C. S. Lewis Nature Reserve.

Additionally, the installation would diminish the value of the surrounding properties, which I'm concerned may affect residents' future plans in terms what properties they will be financially able to buy if they wish to move away.

Finally, the proposed positioning of the installation, next to a children's playground and close to the culturally important site of Lewis' grave and two nature reserves, seems troubling to me.

***Yours sincerely,
Esther Forey-Miller.***
