

Replacement Shopfront Application – ‘Repair my Phone Today’

7 New Inn Hall Street Oxford OX1 2DH

Noise Impact Assessment

We confirm that owing to the nature of this application, this is not relevant / answerable. The application is for a direct shopfront removal and replacement (retrospective), therefore the only noise assessment to be considered will be the actual removal of the glazing / frames to clear the shopfront aperture. This was standard removal works, which was undertaken in normal working hours, therefore was not subject to any special assessment.

On the basis above we believe that a Noise Impact Assessment is not applicable
