Dear Sirs,

Planning Application (revision to existing Planning Permission 20/0956/FFU)

Site: 2 Parkway, Camberley, Gu152PE

Please find attached via the Planning Portal system a Planning application for the erection of a lift shaft and revision of the granted planning permission. We are advised that there is no further fee applicable for this revision as it is within twelve months of the initial grant.

It is proposed to construct the lift shaft in materials to match existing. The footprint of the lift shaft will be approximately 1.4 sq metres and will give the outward appearance of a chimney and we believe will have limited visual impact.

The platform lift will greatly improve access for ourselves to the first floor and being externally mounted will reduce the impact on internal circulation space and thereby facilitate ease of accessibility.

We attach the relevant documentation required and should you require anything further please let me know.

Kind regards

Angeline George
