

## **QMS-04-301 Method statement – completion of the reporting, archiving and publication of previous historic building recording work**

GCR

**1-3 Clark's Row, r/o 84 St Aldate's, Oxford**

Govericks Ltd.

November 2019

Following receipt of the report on the sub-surface archaeology on the site, the Oxfordshire Buildings Record will prepare a publication text to be provided to the City Council Archaeologist within six months of the receipt of that report. The publication text will be written as a chapter in a planned OBR publication on Oxford buildings, but if for any reason that volume does not appear it will be submitted to the journal Oxoniensia (within five years of commencement of development with appropriate funding to secure publication) unless this timescale is otherwise varied in writing by the Local Planning Authority. Either of these will satisfy the requirement to publish a detailed report.
