

Environmental Statement

All the works that we will be carrying out will be using local materials and local labour to ensure the impact on the environment is kept to a minimum. The works will be managed from our existing welfare facilities based at Site T and all works will be safely carried out and in a timely manner. There will be no requirement for any on site facilities and all workers will be parking on Site T or within the compound we have along Heritage Way. The footpath will be redirected for the period of time that the works will be done through the park opposite the Millennium Bridge and onto Heritage Way and then back onto Searle Drive. There will be no noise levels of a level that are likely to disturb any wildlife on the sea shore.
