Hi Lisa

Ref: 2021/0618 article 2 of your correspondence please find below Access and Design statement:

We would like to re-locate the drive to the other end of the property.

The existing drive is on a corner and junction between The Street and Mill Road. We have a blind spot which is dangerous leaving the current drive when entering the highway.

There is no kerb along the edge of the existing road and I propose a hard block surface to enable wheelchair movement between vehicle and property.

This will enable us to exit and enter our property more safely.

This drive relocation would enable easier access for my elderly disabled mother who often uses a wheelchair due to her health and disabilities when visiting our home.

Kind regards

Bob Coe
