

Ecology and Trees Checklist

This checklist is required for **ALL** planning applications. Understanding the ecology on and near a site and taking action can avoid delays in planning, create a better quality scheme and avoid criminal prosecution.

Tick all features present and those that **COULD** be affected by any aspect of the proposal, including:

- development above and below ground, including matters such as the connection of utilities
- large vehicles accessing the site, such as cranes or delivery lorries
- materials storage and where building works (e.g. concrete mixing) would take place

Are the following within the specified distance to the red line boundary? Are they affected or unaffected by the proposal?	Yes - affected by proposal	Yes - unaffected by proposal	No
