Ash Trees 27 Bownham Mead

Upon inspection of 7 Ash trees at '27 Bownham Mead' I can confirm they are showing signs of ash dieback and also have several unrelated defects. National Trust have already removed diseased trees adjacent to the property.

It would be wise for the removal of these trees to be taking place as soon as possible before the trees health compromises the safety of the contractors undertaking the work. They also pose a risk to the road nearby and several large walls.
