

Current views of The Finches, showing where the proposed first floor extension will be added.

The proposed first floor extension will be over the garage (and utility room behind it).

The extension will be set back 45cm (2 brick lengths) from the front elevation. It will have a (smaller) uPVC window, which matches the front windows in style.

The extension will meet the rear elevation. It will have a uPVC window, which matches the nearest two rear rear windows in style and shape.

The Bathroom windows will both be opaque and will both be smaller than the existing bathroom window.
