

CDM (Construction - Design and Management) 2015

In order to avoid foreseeable risks The Principal Designer has eliminated hazards where reasonably practicable at the design phase. Where foreseeable hazards could not be designed out and in order to reduce the risk associated with those that remain, the following hazards have been identified :

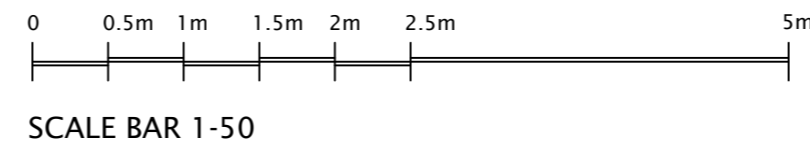

- 1.
- 2.

Unforeseen works

It is not always possible to identify all elements of construction of an existing building without carrying out extensive disruptive surveys at an early stage. The client should make allowance within their contingency for any costs associated with unforeseen works uncovered as the works progress.
