4 (a). Using the information obtained through research and on-site analysis provide a summary of the history of the site/building.

Please add a summary history of the site/building including specifically the parts that will be impacted by the proposals – e.g. how the site/building was originally laid out, how it has evolved, phases of construction and/or change. Please also provide information on past impacts – e.g. modern extension, drainage, former footings, recent landscaping, gardening. **Please include / attach any research material as an addendum to this Statement after Appendix 1.**

There are no listed buildings within 250m of the site

The site is not within a Conservation Area. There are no Registered Parks and / or Gardens within 250m of the site. There are no Historic Battlefields within 250m of the site. The site is located within an ANA defining the West Blatchington Roman villa complex, as well as Bronze Age and Iron Age occupation, kilns and burials.

There are no recorded non-designated heritage assets within the site boundary. There has been no recorded below ground archaeological investigation of this site. [1] Historic mapping for the site records the area as fields from the mid-19th century through until the early/mid-20th century. Whilst this building is not currently recorded on the Historic Environment Record, above and below ground remains of this building may be considered to be a non-designated heritage asset. [2]

To the east of the site lies a Late Bronze Age to Roman occupation site with the nearest feature being approximately 40m east of the site.: Two sites of Bronze Age activity lie approximately 200m south east of the site and are evidenced by an "oval cooking place" in natural clay with pottery, charcoal and animal bones overlaid by a thick layer of pot boilers. Two bronze palstaves and a broken winged axe were also found along with a short ditch or gully containing LBA pottery. Stray finds of the period included two barbed and tanged flint arrowheads and scrapers. The Iron Age and Roman concentration is to the east. Four rectangular pits contained Iron Age pottery and daub were found, along with ditches dating to the 1 st century BC-AD, and a late 1 st century inurned cremation. Several pits, possibly storage pits, were associated with a possible working floor. A basilican Roman villa was dated to the 3rd -4 th centuries with series of 11 corn drying ovens and associated ditches (probable road or field boundaries); one was overlaid by 3 rd -4 th century occupation floors. A Romano British hut floor or workshop, containing iron tools, 2 nd, 3rd and 4 th century pottery was recovered, along with a burial site comprised three groups of cremations. [4]

4 (b) What research have you undertaken to understand the significance of the heritage asset(s) affected?

Please tick the relevant boxes

5. What is important about the affected heritage asset(s) ('the significance')?

Use this space to describe the significance of the heritage asset(s) including their setting (and any below ground archaeology) identified in Section 3. Please see the guidance notes on page 9 on what a heritage asset is and how to define significance.

(Please continue on a separate sheet of paper if further space is required and attach / include as an addendum to this Statement after Appendix 1.)

6. How will the proposals impact on the significance of the heritage asset(s) including their setting?

Please discuss what impact the proposals have on the heritage asset(s) i.e. loss or disturbance of historic building fabric, below or above ground archaeological impacts, setting or change of relationship between buildings and altering scale. **(Please continue on a separate sheet of paper if further space is required and attach / include as an addendum to this Statement after Appendix 1.)**

We do not believe, given the archaeological advice, that there will be any archaeological impact on above or below ground heritage assets.

7. How has the proposal been designed to conserve the significance of the heritage asset(s) including their setting?

Describe how the proposal has been designed to conserve and enhance the significance of the heritage assets (including below ground archaeology). Also describe how any harmful impacts have been avoided or minimised. For example, use of raft foundations, movement of the proposed extension to a less sensitive location.

(Please continue on a separate sheet of paper if further space is required and attach / include as an addendum to this Statement after Appendix 1.)

Please see answer to Question 06 above. In addition a concrete raft foundation will be considered.

Guidance Notes

The **Heritage Statement** should identify all **heritage assets** potentially affected and their settings; describe their significance; and assess the potential impact of the proposal on that significance, including direct physical change and change to their setting.

Heritage assets include designated and non-designated assets, as well as both buildings and below ground archaeology.

The **National Planning Policy Framework (NPPF)** (Department for Communities and Local Government, July 2018) sets out the government's planning policies for England and how these are expected to be applied. The relevant section which relates to heritage is: **Section 189** which states that:

In determining applications, local planning authorities should require an applicant to describe the significance of any heritage assets affected, including any contribution made by their setting. The level of detail should be proportionate to the assets' importance and no more than is sufficient to understand the potential impact of the proposal on their significance. As a minimum the relevant historic environment record should have been consulted and the heritage assets assessed using appropriate expertise where necessary. Where a site on which development is proposed includes or has the potential to include heritage assets with archaeological interest, local planning authorities should require developers to submit an appropriate desk-based assessment and, where necessary, a field evaluation.

National Planning Policy Framework:

For **further information** on assessment of significance and assessing the potential impact of a proposal on that significance, including setting, can be found in (or their future updates):

- CLG (2012) **National Planning Policy Framework (NPPF)** (especially paragraph 17, Section 12 and Annex 2 Glossary)
- CLG (2014) **Planning Policy Guidance (PPG)** (especially 18a, paragraph 001-063)
- Historic England (2015) **Good Practice Advice (GPA) note 2 Managing Significance in Decision Taking in the Historic Environment**
- Historic England (2015) **Good Practice Advice (GPA) note 3 The Setting of Heritage Assets**

The NPPF and PPG also include a Glossary and explanation of terms, such as 'heritage asset', 'setting' and 'significance':

Heritage asset: A building, monument, site, place, area or landscape identified as having a degree of significance meriting consideration in planning decisions, because of its heritage interest. Heritage asset includes designated heritage assets and assets identified by the local planning authority (including local listing).

Setting of a heritage asset: The surroundings in which a heritage asset is experienced. Its extent is not fixed and may change as the asset and its surroundings evolve. Elements of a setting may make a positive or negative contribution to the significance of an asset, may affect the ability to appreciate that significance or may be neutral.

Significance (for heritage policy): The value of a heritage asset to this and future generations because of its heritage interest. That interest may be archaeological, architectural, artistic or historic. Significance derives not only from a heritage asset's physical presence, but also from its setting. (NPPF Annex 2: Glossary)
