Dear sir/madam,

I am writing to vote against yet another proposed plan for Fort Halstead in which we don't need.

I strongly disagree with having hundreds of houses built so close to my home in which will have a massive impact on the traffic in the area, pollution and more road noise. Attracting more people to our quiet town isn't necessary.

It will not only impact the people and children of Halstead and surrounding areas, it will have a huge impact on the wildlife as they use the surrounding woodlands and Fort Halstead area to pass through from surrounding fields. Without this, what was and is now more of a nature reserve you would be driving the nature away. Doing something which shouldn't be done in this area of beauty.

Other reasons which make a valid point to not build this 'town' are as follows:

- effect on listed buildings and conservation area.
- layout and density of the buildings.
- high rise buildings.
- access points to the area.
- it's an excuse to make a group of people a lot of money and it won't do anything for the area.
- there is no need for the amount of housing and other amenities.
- highway safety.
- isn't this green belt land which shouldn't/can't be built on by law?!

These are all very valid points which I hope do get addressed and hope it's enough to stop the plans once again!!

Kind regards

Simon Palin
