Dear Barry

re: 13 – 17 High Street, Wisbech, Cambs

With regard to the parapet wall, it appears that the Conservation Officer has given permission for the additional works.

ST1 Group Ltd have also raised queries with regards to underlying issues that caused this movement to the parapet wall.

This was basically due to a slender wall being too high. There was only a tie bar but this also needed to be a strut propping back to the roof and the tie bar had buckled.

The wall was able therefore to rotate. There was also considerable erosion arising.

Obviously repair would rectify the erosion but this could gradually continue but this would be the case with many old buildings in such High Street locations. Some ongoing maintenance would be required to such buildings.

The new roof will however brace the wall and give adequate support.

Cont'd/.... V.A.T 876 0014 34

Reg : 5525923

We trust this is satisfactory, however, if you have any queries please do not hesitate to contact our office.

Yours sincerely
