Good Afternoon Alexa,

As per our telephone conversation please find answers that should help your queries on the planning application submitted for the above address:

The failed and hung up branches are mostly located in the canopy over the driveway as per picture 4 attached. The branch that needs to be removed is partly torn out and resting on the lower parts of the canopy is located on the Middle East facing limb towards the very top as pictured in 13.

The limb that is to be removed is just above the main fork due to major stress fracture. It is pictured in the attached photo 14.
