Dear Sir,

I have received the attached rejection regarding discharge of condition 4 relating to the above planning approval. Since submitting application for discharge on 12 February 2021 I have contracted a supplier to conduct a noise test throughout the building and indeed between house number 8 and 6 Rhodes Avenue. The intent being to support discharging condition 4 to planning. I was planning on presenting this report at time of on site visit. But it seems more pertinent now. Please see attached this report which will hopefully close the matter.

Thank you for your assistance in advance,

James Lyons
