Dear Jerome,

Re: Multi-stem Sycamore in rear garden at the above property.

- 1 x mature multi-stem Sycamore. All of the unions where the stems converge have decay in them. Some of these unions are also included. The potential for the failure of any of these limbs is high and the risk of them causing damage to property or persons if such a failure occurred is also high. I would therefore recommend that it be felled.

Kind regards
Anthony Falconer BSc. Env. Biol, FdSc. Arb.
