

Description of Proposal.

We are asking for permission for two temporary structures vital towards our small business.

The first is a standard $\frac{1}{2}$ size (6m) storage container which we will cover in grass/fake grass to blend in with the natural environment.

This is essential for secure storage of tools/machinery/equipment for our business on the land.

The second is a caravan, which will be used for office use, shelter, seasonal drying room and team making facilities. This is in accordance with policy H515 of the local plan, stating a caravan can be used for business purposes on greenbelt land.

We will be using the land as a small permaculture plot. With a variety of fruit trees, native trees, bushes and herbs to be harvested and felled each year or season, whilst also promoting local wildlife.

We already have an online business outlet for selling natural products made from the land. There is no build in work in this proposal.
