

Hi Lisa

Sorry I missed your call. I called back but understand you're working from home. I hope I jotted down your email correctly.

Apologies too, I don't appear to have your emails, so I do apologise if my writing was eligible and incorrectly gave you the wrong address!

With regard to the walnut tree, I am useless with measurements really, but I have asked my dad who is much better! Height is approximately 15-17 metres and spread is approximately 12-15meters. Its a monster really for a small residential garden like mine.

So grateful for your help with this. Would love to be able to use the garden this summer, especially after lockdown.

My daughter had a bad reaction to sesame seed oil recently, so it seems her nut and seed allergy is getting worse, not better, which is sad indeed.

Many thank again in advance.

Kind regards  
Chantal Beck
