

## EXTERIOR WALL INSULATION & RENDERS

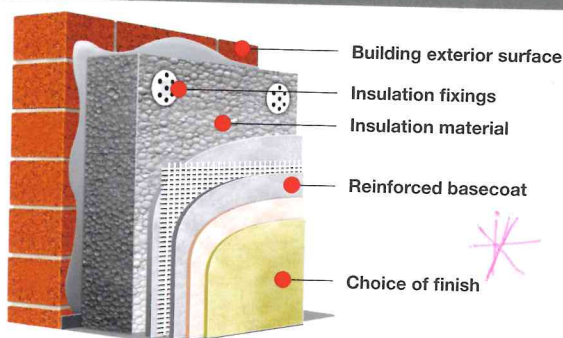

### EWI SYSTEMS

*Render we hope to use market with \**

Johnstone's Trade EWI Systems provide everything needed to install a fully BBA approved EWI solution including insulation, boards, fixings, profiles, basecoats and renders.

At least 35% of heat loss from a typical solid wall property can be through the wall. Our full systems provide significant thermal benefits as well as a high performance and long lasting render finish in a wide range of options.

#### Typical EWI system configuration

## EXTERIOR WALL INSULATION & RENDERS

### FINISH OPTIONS

Both EWI and Render systems are available in a range of finishes including silicone enhanced scratch, dash and brick effect renders. Slip systems for clients who require a non-slip finish on a property. It's also possible to finish with cement renders with Johnstone's Trade

Silicone Enhanced Render

Brick Effect Render

### RENDER SYSTEMS

Deciding which Render system to use on your project depends on a number of factors including the type of substrate the render is to be applied to. This table provides a general overview of the systems available within the Johnstone's Trade Stormshield range.

SYSTEM	FINISH	BBA APPROVED
High Flexibility	Full Silicone Render	■
	Silicone Enhanced Render	■
High Performance	Full Silicone Render *	■
	Silicone Enhanced Render	■
	Dash Render	
	Brick Effect Render	
Scratch Render	Traditional Scratch Render	■
	Brick Slips	
OCR*	Silicone Enhanced Render	
	Masonry Paint	

\* Johnstone's Trade Stormshield OCR is not BBA approved. Stormshield Silicone Enhanced Render and Masonry Paints.

Key Coat Primer may be needed depending on condition and surface finish.
