Sefton Council
(via Planning Portal)

Dear Sir/Madam,

Proposed siting of extract equipment to rear of 8 Eastbank Street Southport PR8 1DW

We act as planning consultants to Aquila UK Limited who wish to operate a restaurant from the former McDonalds premises at 8 Eastbank Street.

The proposed extraction system will be internally located at ground and first floor level such that it does not constitute development as defined in the Planning Act and existing louvered grilles will be used for air in and air out purposes. However part of the duct will exit externally into the alleyway to the rear and enter back into the first floor such that this may require planning permission. The duct will only partially be located in the rear service yard such that there is no impact on amenity or appearance of the area. A number of existing air condenser unit will also be replaced for modern quieter units. Full details are supplied on the submitted plans.

If you have any queries relating to this proposal please do not hesitate to contact these offices in the first instance.

Yours sincerely,

HARIS KASUJI BA MA MRTPI
