ABOUT HODKINSON CONSULTANCY

Our team of technical specialists offer advanced levels of expertise and experience to our clients. We have a wide experience of the construction and development industry and tailor teams to suit each individual project.

We are able to advise at all stages of projects from planning applications to handover.

Our emphasis is to provide innovative and cost effective solutions that respond to increasing demands for quality and construction efficiency.

This report has been prepared by Hodkinson Consultancy using all reasonable skill, care and diligence and using evidence supplied by the design team, client and where relevant through desktop research.

Hodkinson Consultancy can accept no responsibility for misinformation or inaccurate information supplied by any third party as part of this assessment.

This report may not be copied or reproduced in whole or in part for any purpose, without the agreed permission of Hodkinson Consultancy of Rickmansworth, Hertfordshire.

Executive Summary

The purpose of this Health Impact Assessment (HIA) is to assess and identify the potential positive and negative impacts of the proposed development at 88 Green Lanes by TFC Palmers Green Limited in the London Borough of Enfield on health and wellbeing, in accordance with the National Planning Policy Framework, the London Plan (2021) and London Borough of Enfield planning policy.

In accordance with relevant guidance, the structure of this document follows that of a Desktop HIA and as such largely follows the structure of the recommended Healthy Urban Planning Checklist published by the London Healthy Urban Development Unit (HUDU). A completed HUDU Checklist is also included in **Appendix A**.

This HIA considers the following themes:

- > **Theme 1: Healthy Housing** – The development provides new housing with a good level of accessibility in accordance with London Plan policy and a good mix of units in terms of size and tenure. An assessment of the design in relation to health has been undertaken with specific focus on meeting carbon dioxide emission targets, sound insulation, private space and accessible and adaptable dwellings.
- > **Theme 2: Active Travel** – The proposed development incorporates measures to promote active travel such as cycle storage for residents, visitors and staff. The development site is well located to the local area and is in a sustainable location with good access to public transport.
- > **Theme 3: Healthy Environment** – An array of measures are included within the design and construction of the development to reduce negative impact on the environment, enhance biodiversity and implement sustainable drainage system such as permeable paving.
- > **Theme 4: Vibrant Neighbourhoods** – The proposed development is well located for access to local services, employment and amenities making a positive contribution to the vibrancy of the wider neighbourhood.

1. INTRODUCTION

- 1.1** This document has been prepared by Hodkinson Consultancy, a specialist consultancy for planning and development to accompany the planning application for the proposed development at 88 Green Lanes, London, N13 5UP.
- 1.2** The London Plan Policy GG3 states that the impacts of major development proposals on the health and wellbeing of communities should be considered, for example through the use of Health Impact Assessments (HIA). The Mayor of London's Social Infrastructure SPG (2015) describes a HIA as a '*practical decision-making tool that enables the potential positive and negative impacts of a proposal on health and wellbeing to be considered in a consistent, systematic and objective way*'. HIAs are also useful tools for informing developments of local policies and plans.
- 1.3** In accordance with the Mayor of London's Social Infrastructure SPG, this HIA is designed to identify opportunities for maximising potential health gains and minimising harm, whilst addressing inequalities and taking account of the wider determinants of health.
- 1.4** In accordance with relevant London Plan guidance, a Desktop HIA structure has been applied to the proposed development and therefore largely follows the structure of the recommended Healthy Urban Planning Checklist published by the London Healthy Urban Development Unit (HUDU). A completed HUDU Checklist is also included in **Appendix A**. More detailed information about the structure of this HIA is set out in Chapter 5.

2. DEVELOPMENT OVERVIEW

Site Location

- 2.1 The proposed development site at 88 Green Lanes, N13 5UP in the London Borough of Enfield is located in Palmers Green. The site is approximately 0.25 hectares in size and is bound by Green Lanes to the west, commercial properties to the north and east, and the A406 to the south. The location of the site is shown in Figure 1 below.

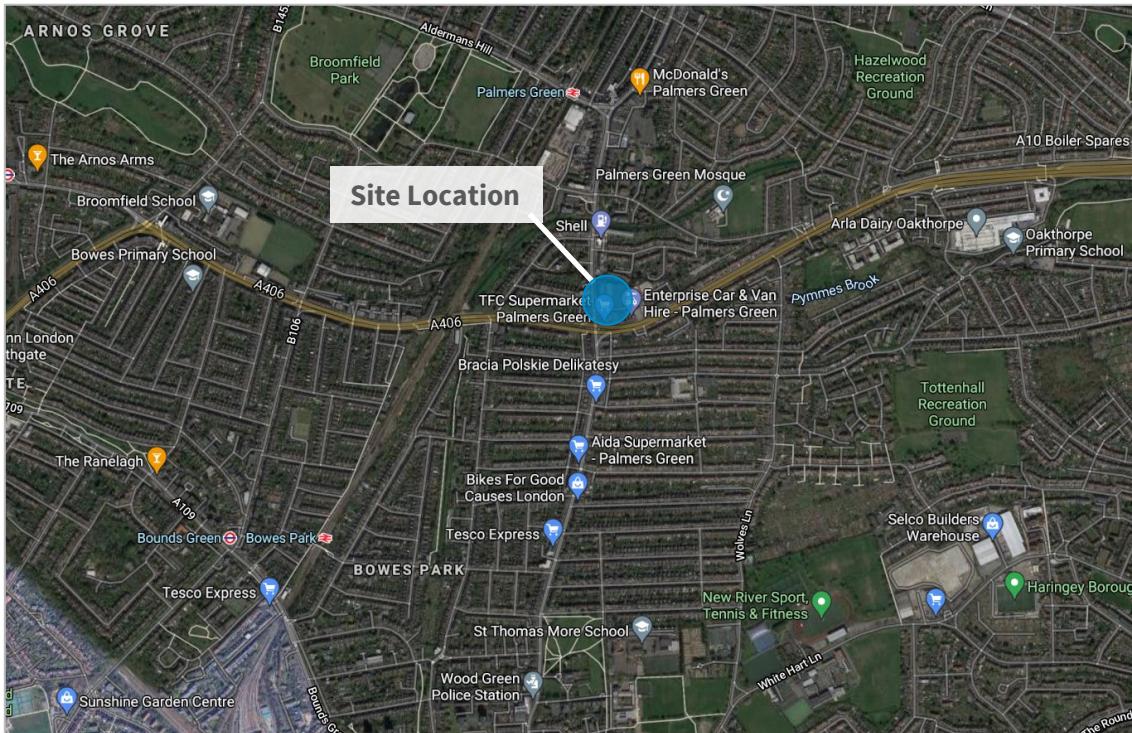

Figure 1: Site Location – Map data © 2021 Google

Development Proposals

- 2.2 This report supports the full application described as follows:

“Redevelopment of the site to provide a part 3/8/12 storey building comprising 52 residential apartments and 2 commercial units comprising 638sqm of supermarket retail space and 495sqm of restaurant floorspace.”

- 2.3 Figures 2 and 3 overleaf indicate the proposed ground and first floor layouts.

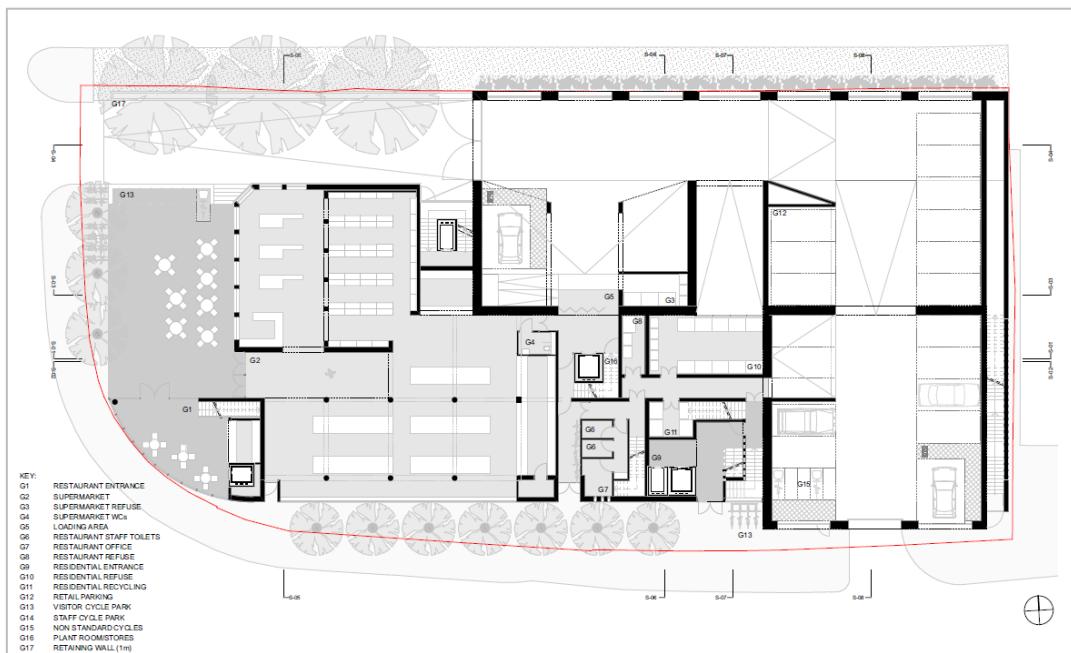

Figure 2: Proposed Ground Floor Plan – Sutherland Hussey Harris and NArch London (Sept 2019)

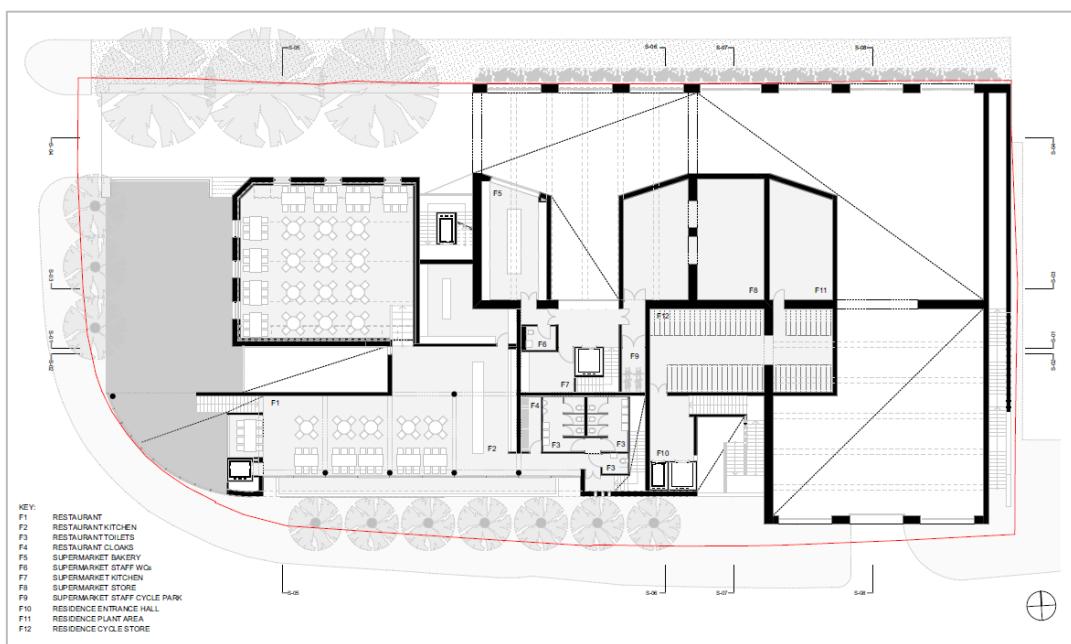

Figure 3: Proposed First Floor Plan – Sutherland Hussey Harris and NArch London (Sept 2019)

3. RELEVANT POLICY

- 3.1 The following planning policy and legislation has led the structure of the Health Impact Assessment for the proposed development.

National Planning Policy: NPPF

- 3.2 The revised National Planning Policy Framework (NPPF) was published on the 19th February 2019 and sets out the Government's planning policies for England. The NPPF states that the planning system can play an important role in promoting healthy communities. It supports the role of planning to create healthy, inclusive communities by supporting local strategies to improve health, social and cultural wellbeing for all and by working with public health leads and health organisations to understand and take account of the health status and needs of the local population.

- 3.3 Building on the above, Chapter 8 of the NPPF calls for the promotion of healthy and safe communities which:

- > Promote social interaction, including opportunities for meetings between people who might not otherwise come into contact with each other – for example through mixed-use developments, strong neighbourhood centres, street layouts that allow for multiple connections within and between neighbourhoods, and active street frontages;
- > Are safe and accessible, so that crime and disorder, and the fear of crime, do not undermine the quality of life or community cohesion – for example through the use of clear and legible pedestrian routes, and high quality public space, which encourage the active and continual use of public areas; and
- > Enable and support healthy lifestyles, especially where this would address identified local health and wellbeing needs – for example through the provision of safe and accessible green infrastructure, sports facilities, local shops, access to healthier food, allotments and layouts that encourage walking and cycling.

Regional Planning Policy: The London Plan (2021)

- 3.4 The new London Plan (2021) links planning and health throughout and includes the following policy on improving health and addressing health inequalities:
- 3.5 **Policy GG3 Creating a Healthy City** states that those involved in planning and development must assess the potential impacts of development proposals on the mental and physical health and wellbeing of communities, in order to mitigate any potential negative impacts, maximise potential positive impacts, and help reduce health inequalities, for example through the use of Health Impact Assessments.

Mayor of London's Social Infrastructure SPG (2015)

- 3.6 This Supplementary Planning Guidance, adopted in May 2015, describes a Health Impact Assessment as a practical decision-making tool that enables the potential positive and negative impacts of a proposal on health and wellbeing to be considered in a consistent, systematic and objective way.
- 3.7 The SPG sets out the different types of Health Impact Assessment and when to use each type. Health Impact Assessments are commonly categorised as 'full', 'rapid' or 'desktop':
- > **Full:** A 'full' HIA involves comprehensive analysis of all potential health and wellbeing impacts. It can be demanding in time and resources e.g. requiring an extensive evidence search, expert analysis and primary data collection (including qualitative feedback from local residents and other stakeholders).
 - > **Rapid:** A 'rapid' HIA is a less resource-intensive process, involving a more focused investigation of health impacts, and usually takes days or weeks to complete (but still considers both quantitative and qualitative evidence sources, including some consultation with local stakeholders).
 - > **Desktop:** The 'desktop' HIA draws on existing knowledge and evidence to complete the assessment, often using published 'checklists' developed for this purpose.
- 3.8 The SPG stipulates that the type of HIA required should be proportionate to the size of the plan or project type and its likely implications for health and social infrastructure. The SPG also provides a suggested approach for deciding when to use different types of HIA (referred to in the following chapter of this report).

Local Planning Policy: London Borough of Enfield

- 3.9 The London Borough of Enfield as quoted in Section 5.5 of the Core Strategy (2010) states:
- "Improving the health and wellbeing of Enfield's residents and reducing the inequalities in health across the Borough is a key objective of the Enfield Strategic Partnership that is reflected in both the Sustainable Community Strategy and Local Area Agreement."*
- 3.10 **Strategic Objective 5 Education, Health and Wellbeing:** To ensure the capacity and quality of local infrastructure provision including schools and further education, health and policing facilities, social care, retail services, leisure and recreation facilities is sufficient to meet the needs of Enfield's existing population and new residents. To promote healthier lifestyles and to address inequalities in health and educational attainment between Enfield's residents particularly in areas such as Edmonton Green, Enfield Highway, Ponders End, Turkey Street and Upper Edmonton, where these issues are more prevalent.

- 3.11 Core Policy 7 Health and Social Care Facilities and the Wider Determinants of Health** states that the existing health and social care provision in the Borough will be retained where these continue to meet or can be adapted to meet needs. For major developments, the application will be required to undertake a Health Impact Assessment.

London Healthy Urban Development Unit (HUDU)

- 3.12** The London Healthy Urban Development Unit (HUDU) works with local, London wide and national organisations on behalf of the NHS. HUDU provides specialist expertise and advice to enable the health and planning sectors to work together effectively to improve the health and wellbeing of London's diverse communities.
- 3.13** The current London Plan states that more than 65,000 homes will need to be built each year in London to accommodate the projected growth in population. This creates enormous opportunities to improve services and facilities to meet changing healthcare needs.

4. BASELINE CONDITIONS

- 4.1** The proposed development lies in the London Borough of Enfield, in north London. The Office for National Statistics administers a census of the population of the United Kingdom every ten years and the most recent census was in 2011.
- 4.2** As of 2011, there were 312,466 usual residents within the London Borough of Enfield. In the 2011 census, 81.85% of the population of Enfield considered themselves to have very good health and good health. On the other hand, 5.45% of the population considered themselves to be in bad and very bad health. The census of England as a whole stated that 81% considered themselves to have very good and good health, therefore Enfield appears to be similar to the England average as a whole.
- 4.3** In regard to long-term health problems or disabilities, 84.65% of the population said that their day-to-day activities were not limited by their health. However, 7.26% said their day-to-day activities were limited a lot. This was compared to England as a whole, whereby 82.36% of the population said that their day-to-day activities were not limited by their health and 8.31% said their day-to-day activities were limited a lot.

5. STRUCTURE OF THE HIA

Using an appropriate type of HIA

- 5.1 In accordance with the suggested approach set out in the Mayor of London's Social Infrastructure SPG, a Desktop HIA is considered the most appropriate for 88 Green Lanes. This is because the proposed development does not include a major infrastructure project, nor is it subject to an Environmental Impact Assessment.
- 5.2 In order to provide an appropriate level of assessment and in accordance with guidance in the Mayor's SPG, the London Healthy Urban Development Unit (HUDU) Healthy Urban Planning Checklist April 2017 version has been used. This is the latest version of the HUDU Checklist and despite it referencing the previous London Plan, it reflects the Mayor's Social Infrastructure SPG which is still a material planning consideration.

Themes

- 5.3 In accordance with the HUDU Healthy Urban Planning Checklist, this HIA is divided into the following four themes:
 - > **Theme 1: Healthy Housing** – Includes an assessment of housing design, accessible housing, healthy living, and housing mix and type.
 - > **Theme 2: Active Travel** – Includes an assessment of measures to promote walking and cycling, safety, connectivity, and minimising car use.
 - > **Theme 3: Healthy Environment** – Includes an assessment of construction, air quality, noise, contaminated land, open space, play space, biodiversity, local food growing, flood risk and overheating.
 - > **Theme 4: Vibrant Neighbourhoods** – Includes an assessment of healthcare services, education, access to social infrastructure, local employment and healthy workplaces, access to local food shops and public buildings and spaces.
- 5.4 In accordance with the HUDU checklist guidance, it may be the case that some issues under the above mentioned themes will be more relevant to the development than others. Also, some issues may be directly related to the development whilst others may be relevant at a neighbourhood level where the cumulative impact of developments can contribute to the health of the neighbourhood.
- 5.5 Within the following chapter, this HIA provides information and assessment of each theme and refers to relevant planning policy where appropriate. A HUDU Healthy Urban Planning Checklist has also been completed and is included in **Appendix A**.

6. HEALTH IMPACT ASSESSMENT

Theme 1: Healthy Housing

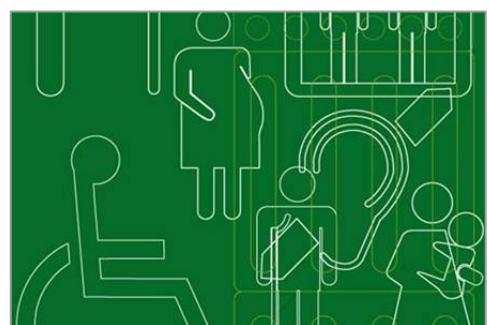

Healthy Design

- 6.1 An assessment of the design in relation to health has been undertaken with specific focus on meeting carbon dioxide emissions targets, sound insulation, private space, and accessible and adaptable dwellings.
- 6.2 The energy efficiency of homes has a significant impact on human health. The energy usage in homes contributes a significant proportion of the UK's total carbon emissions, therefore contributing to global CO₂ emissions.
- 6.3 A Sustainability and Energy Strategy Report has been produced by Syntegra Consulting. Through the implementation of the London Plan Energy Hierarchy *Be Lean, Be Clean and Be Green*, which includes fabric efficiency measures, Mechanical Ventilation with Heat Recovery (MVHR) and PV Panels, a 36% CO₂ reduction over Part L 2013 Building Regulations is targeted. Please refer to the report for further detail.
- 6.4 All dwellings will be provided with inclusive outdoor space in the form of a playground and garden, and private balconies. There will also be provision of a green sedum communal terrace on the upper levels.
- 6.5 In order to reduce the likelihood of noise disturbances and complaints from neighbours and to ensure high quality developments are created, the development will be aiming to achieve airborne sound insulation values that will improve upon the performance standards outlined within the Building Regulations for England and Wales, Approved Document E.

Accessible and Adaptable Housing

- 6.6 In terms of access, 90% of the new dwellings will be designed and built to Building Regulations Approved Document M4(2) standards, with 10% to Part M4(3) in accordance with London Plan Policy D7. These standards will ensure accessible and adaptable accommodation for everyone; young families, older people, individuals with a temporary or permanent physical impairment, and allow residents to stay in their home despite

developing disabilities. They also enable flexibility, visitability (facilitating ease of visiting access to the homes by everyone, regardless of mobility or disability) and future-proofing (i.e. the accommodation will be adaptable and able to respond to changing technological and environmental conditions. The proposed developments will also incorporate the requirements of the Equality Act (2010) into the design where possible.

Healthy Living

- 6.7** The dwellings within the proposed development have been designed to comply with the relevant London Plan and Nationally Described Space Standards which includes minimum standards for bedrooms, storage, and internal areas.
- 6.8** Guidance on healthy living recommends that to promote healthy living outside of individual dwellings it is important that staircases are located at the front of buildings to encourage people to use them. In the case of the proposed development, the applicant will ensure that the stairs are easily accessible, attractive, welcoming and adequately lit to encourage residents to use them.

Housing Mix

- 6.9** It is important for an appropriate housing mix to be provided within new development in order to create mixed and socially inclusive communities which have a positive impact on the physical and mental health of those living in overcrowded, unsuitable or temporary accommodation. Policy D6 of the London Plan states that Londoners should have a genuine choice of homes that they can afford, and which meet their requirements for different sizes and types of dwellings in the highest quality environments.
- 6.10** Overall the proposed development will provide 52 dwellings, comprising 1-bedroom, 2-bedroom and 3-bedroom flats. Of the dwellings, 34 will be private sale and 18 will be affordable housing. The mix of units is considered appropriate to a development of this size and will bring about a community comprising a variety of resident's from single people, couples and families.

Theme 2: Active Travel

Promoting Walking & Cycling

- 6.11** Sustainable transport options have been considered in respect of the development and measures have been incorporated into the design to promote healthy travel methods by residents. These include the provision of both short-stay and long-stay cycle parking spaces. Short-stay cycle parking will be in the form of 14 Sheffield type stands able to accommodate up to 28 cycle spaces. Long-stay cycle

parking for the staff of the food store will be provided with 4 cycle parking spaces in a cycle store at first floor level.

- 6.12** The residential units will have a dedicated cycle storage area on the first floor, directly accessible from the main elevator able to accommodate up to a total of 120 cycle storage spaces.
- 6.13** The residents will have access to good cycling facilities within close proximity to the site, including advanced stop lines for cyclists at the south and north arms of Green Lanes/North Circular Road signalised junction. There is also a segregated cycle lane along North Circular Road and several cycle routes proposed across the London Borough of Enfield.
- 6.14** In terms of walking, the site is well located in terms of its proximity to local facilities, amenities as well as town centre shops and services. A variety of different services are located within 2km of the site including convenience stores, a number of primary and secondary schools, GPs and pharmacies.
- 6.15** In order to further promote active travel, a Residential Travel Plan and Commercial Travel Plan have been produced by SCP Transport.

Connectivity

- 6.16** The proposed development site is well connected to the local area. As previously discussed, the site promotes the use of cycling by providing secure, covered cycle storage within communal stores located at first floor level.
- 6.17** The site is also in a highly sustainable location with excellent access to public transport. The site is located within approximately 700m of Palmers Green Railway Station, whereby Great North trains can be accessed. Slightly further away, approximately 1.6km or a 20 minute walk, is Bounds Green Station which offers Piccadilly Underground line services connecting the site to central London.
- 6.18** In terms of bus services, there are 10 different bus stops located within a 5 minute walk from the proposed development. The 8 available bus routes: 121, 329, 141, 34, 102, 232, N29 and 629.
- 6.19** Furthermore, residents will also benefit from very good access to a range of shops and services within Palmers Green.

Minimising Car Use

- 6.20** Through the provision of cycle storage and a sustainable location, within close proximity to transport links such as bus services and train stations, the use of sustainable transport modes will be encouraged.

Theme 3: Healthy Environment

Construction

6.21 The development site will be registered with the Considerate Constructors Scheme (CCS) and will target a 'Best Beyond Practice' score .

6.22 The CCS is designed to encourage environmentally and socially considerate ways of working, to reduce any adverse impacts arising from the construction process. As commonly known, the aims are as follows:

- > Enhancing the appearance;
- > Respecting the community;
- > Protecting the environment;
- > Securing everyone's safety; and
- > Caring for the workforce.

6.23 During the construction processes, control procedures will be put in place to minimise noise and dust pollution and roads will be kept clean. Energy and water consumption will be recorded and measured against target consumption rates, and all construction timber will either be recycled or sourced from responsible sources. In addition, measures will be adopted to minimise the impact on the local area during construction including the limiting of air and water pollution in accordance with best practice principles.

6.24 The London Plan – The Control of Dust and Emissions during Construction and Demolition SPG seeks to reduce emissions of dust from construction and demolition activities in London. In accordance with this SPG and other relevant legislation, policy and guidance on the matter including London Plan Policies 5.3 and 5.18, it is anticipated that measures will be implemented to reduce the impact of construction such as noise, vibration and dust, including the following:

- > Applying 'Best Practical Means' to reduce noise and vibration and their impacts;
- > The application of 'Prior Consent' to the Local Authority for noise generating activities;
- > Continuous monitoring during works and attention to agreed site working hours;
- > Minimising noise and vibration through effective working practices;

- > Reducing dust through preparation, maintenance and operating techniques;
- > Preventing pollution;
- > Maintaining neighbourhood relations through community engagement before and during construction to help alleviate fears and concerns; and
- > Minimising disruption to the local highway network.

6.25 The above measures will ensure that the impact of the construction process on the health of the local environment will be effectively minimised and managed.

Air Quality

- 6.26** The long-term impact of poor air quality has been linked to life-shortening lung and heart conditions, cancer and diabetes. Addressing air pollution as a result of new development is therefore important. During construction, best practice measures in terms of air quality will be implemented.
- 6.27** Volatile Organic Compounds (VOCs) are chemicals that are emitted from paints, varnishes, carpets and other fittings and finishes. The use of VOCs and formaldehyde emitting products and materials will be minimised.

Noise

- 6.28** Reducing noise pollution helps to improve the quality of life for residents, particularly in urban locations. During construction, best practice measures in terms of noise will be implemented.

Open Space

- 6.29** Access to open space is important as it has a positive impact on health and wellbeing. The proposed development include private open space in the form of a resident's garden and play area, which will be landscaped. The location of the site is such that there are also several other areas of open green space within very close proximity, including Broomfield Park, Tottenham Recreation Ground and Alexandra Park.

Play Space

- 6.30** Participation in regular physical activity is vital for healthy growth and development especially for children and young people. As described above, the proposed development includes a private play area for the residents and is within close proximity of public green open spaces, including a number of parks.

Biodiversity

- 6.31** Access to nature and biodiversity contributes to mental health and wellbeing. With new development comes opportunity to enhance ecological value and create new habitats. The development site has been previously used for development and is predominantly covered in hard standing and is therefore considered brownfield.
- 6.32** The proposed development will introduce soft landscaping and private amenity spaces which will provide opportunity for small scale planting. As such it is anticipated that the development will provide a benefit to ecological value and biodiversity. There will also be provision of a green sedum communal terrace on the upper levels.
- 6.33** The following measures will be incorporated into the scheme for soft landscaping and new planting wherever possible:
- > The use of native species and/or species of known wildlife value;
 - > The promotion of local ecology through the use of native seed and fruit bearing species;
 - > Attracting pollinators such as bees and butterflies through the use of flowering, nectar rich species;
 - > Combining natural and ornamental species to enrich the planting mix and promote local biodiversity.

Local Food Growing

- 6.34** Providing space for local food growing helps promote more active lifestyles, better diets and social benefits. The scale of the site is such that providing a significant area for local food growing is unlikely to be feasible. However, as discussed in previous sections, the proposed development will include private amenity spaces which can be used for food growing.

Flood Risk

- 6.35 Flooding can result in risks to both physical and mental health. It is often likely that increasing development densities and building coverage coupled with more frequent extreme weather events will increase urban flood risk. It is therefore important that flood risk, and measures to reduce the risk in new development, is assessed.
- 6.36 According to the Flood Risk Assessment by Syntegra Consulting and the Environment Agency's Flood Map shown in Figure 4 overleaf, the proposed development lies partially in Flood Zone 2, with the western half of the site in Flood Zone 1.

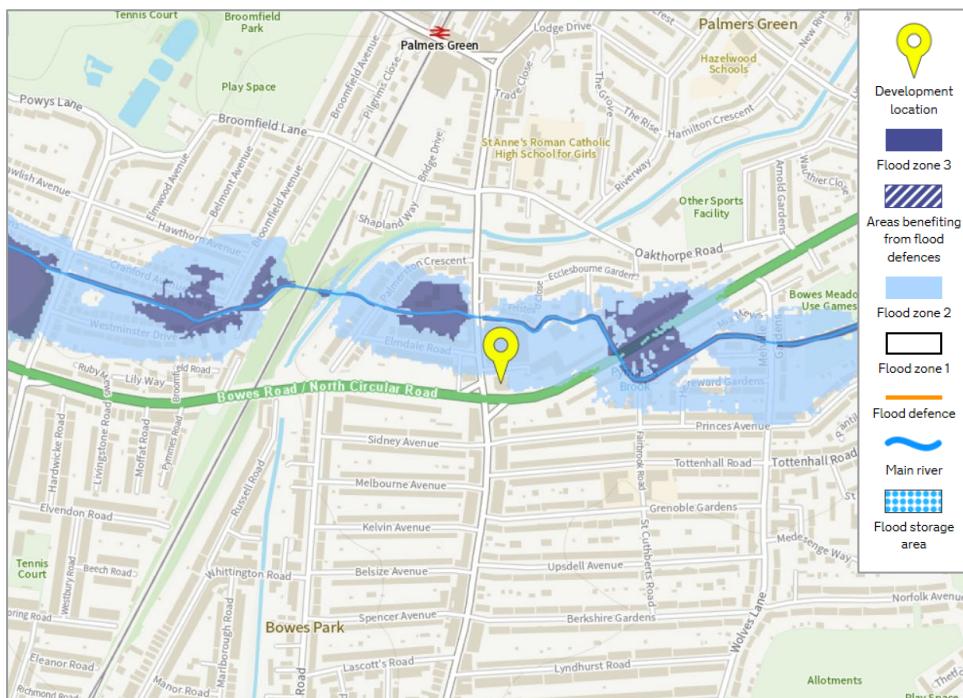

Figure 4: Environment Agency Flood Map – <https://flood-map-for-planning.service.gov.uk>

- 6.37 Despite this, the residential units are at 1st floor level and above, which removes the risk of flooding.
- 6.38 A number of Sustainable Drainage Systems have been proposed, allowing the development to meet surface water quantity management requirements whilst also providing a range of additional benefits for water quality, biodiversity, amenity value, and health and wellbeing of residents. These include permeable paving and an attenuation system.

Theme 4: Vibrant Neighbourhoods

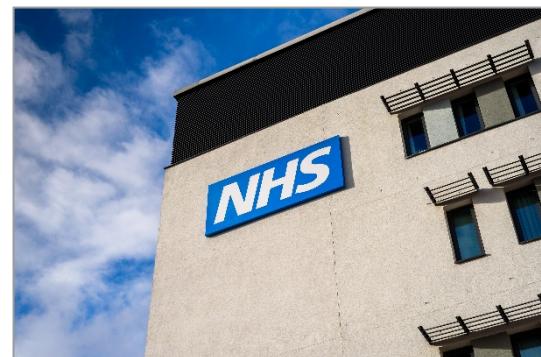

Health Services

6.39 Poor access and quality of healthcare services exacerbates ill health, making effective treatment more difficult. The provision of support services and advice on healthy living can prevent ill health.

6.40 The London Borough of Enfield website provides information on the support services and advice available to residents of the Borough including relating to the following:

- > Adults and older people;
- > Carers;
- > Children and family care;
- > Community transport services;
- > Disabilities
- > Drug or alcohol addiction
- > Food;
- > Fostering, adopting and looked after children;
- > Help to quit smoking;
- > Mental health services;
- > Occupational therapy and specialist equipment;
- > Residential and nursing care; and
- > Support to live at home.

6.41 An NHS Choices search has been undertaken and is included in **Appendix B**.

Education

- 6.42** Access to education can act to improve self, esteem, job opportunities and earning capacity of the local population.
- 6.43** The site is located such that it has several educational establishments within walking distance, including the following:
- > St Michael at Bow Church of England Junior School.
 - > Oakthorpe Primary School.
 - > Earlham Primary School.
 - > Woodside High School.
 - > Heartlands High School.

Access to Social Infrastructure

- 6.44** Good access to local services is important to create and maintain lifetime neighbourhoods. It is not proposed to provide any social infrastructure on the site which is considered acceptable given the scale of the proposed development.

Local Employment & Healthy Workplaces

- 6.45** Unemployment can lead to poverty, illness and a reduction in personal and social esteem and employment can have a positive impact on recovery from physical and mental illnesses.
- 6.46** The proposed development includes commercial space; this space will bring about employment opportunities for local people. Furthermore, the construction process will be expected to create employment and supply opportunities to local businesses and opportunities for the local work force to receive training during site construction. Where possible, the development will utilise the local labour force and local businesses throughout the construction programme.

7. SUMMARY

- 7.1 It is considered through this desktop Health Impact Assessment (HIA) that the proposed development at 88 Green Lanes will benefit from features in the design, and its location within the London Borough of Enfield, that will benefit the health of the occupants. It is also not considered to have any significant adverse impact on the provision of healthcare or educational facilities within the local or wider area.
- 7.2 Furthermore, the proposed development includes design features which will have a positive impact on the health of future residents throughout its lifespan:
- > **Theme 1: Healthy Housing** – The development provides new housing with a good level of accessibility in accordance with London Plan policy and a good mix of units in terms of size and tenure. An assessment of the design in relation to health has been undertaken with specific focus on meeting carbon dioxide emission targets, sound insulation, private space and accessible and adaptable dwellings.
 - > **Theme 2: Active Travel** – The proposed development incorporates measures to promote active travel such as cycle storage for residents, visitors and staff. The development site is well located to the local area and is in a sustainable location with good access to public transport.
 - > **Theme 3: Healthy Environment** – An array of measures are included within the design and construction of the development to reduce negative impact on the environment, enhance biodiversity and implement sustainable drainage system such as permeable paving.
 - > **Theme 4: Vibrant Neighbourhoods** – The proposed development is well located for access to local services, employment and amenities making a positive contribution to the vibrancy of the wider neighbourhood.
- 7.3 In accordance with relevant guidance, a Healthy Urban Development Unit (HUDU) Healthy Urban Planning Checklist has been completed and is attached in **Appendix A**.

APPENDICES

Appendix A

Healthy Urban Planning Checklist

Appendix B

NHS Choices Search Results

Appendix A

Healthy Urban Planning Checklist

Theme 1: Healthy Housing				
Issue	Key questions	Yes /No / Not relevant Comment	Policy requirements and standards	Why is it important
a. Healthy design	Does the proposal meet all the standards for daylight, sound insulation, private space and accessible and adaptable dwellings?	<p>Daylight: Daylight calculations for units within the proposed development have not been undertaken.</p> <p>Sound insulation: Dwellings are aiming to achieve airborne sound insulation values that will improve upon the performance standards outlined within the Building Regulations Part E standards.</p> <p>Accessible and adaptable dwellings: 90% of the new dwellings will be designed and built to Building Regulations Approved Document M4(2) standards, with 10% to Part M4(3).</p>	<p>London Plan Policy 5.2 Minimising carbon dioxide emissions and Housing SPG Standard 35: zero carbon residential buildings from 2016 and non-domestic buildings from 2019.</p> <p>Housing SPG Standard 29 on dual aspect and Standard 32 on daylight and sunlight.</p> <p>Housing SPG Standard 4 on communal open space, supported by London Plan Policy 2.18, Standards 1 and 2 on defining good places, and Standard 3 on public open space.</p> <p>Housing SPG Standards 26 and 27 on minimum provision of private (amenity) open space.</p> <p>London Plan Policy 3.8 Housing choice and Housing SPG Standard 11 on access require 90% of new homes meet Building Regulation M4(2) 'accessible and adaptable dwellings'.</p> <p>Sound insulation and noise - London Plan Policy 7.15 and Housing SPG Standard 30 on noise.</p> <p>Housing SPG Standards 8 and 9 on entrance and approach.</p>	<p>Satisfying these standards can help meet carbon dioxide emissions targets.</p> <p>Good daylight can improve the quality of life and reduce the need for energy to light the home.</p> <p>The provision of an inclusive outdoor space, which is at least partially private, can improve the quality of life.</p> <p>Improved sound insulation can reduce noise disturbance and complaints from neighbours.</p>

Theme 1: Healthy Housing				
Issue	Key questions	Yes /No / Not relevant Comment	Policy requirements and standards	Why is it important
b. Accessible housing	Does the proposal provide accessible homes for older or disabled people?	Yes: 10% of the new dwellings will be designed and built to Building Regulations Approved Document M4(3) standards.	London Plan Policy 3.8 and Housing SPG Standard 11 on access require 10 per cent all new housing to be designed to be wheelchair accessible or easily adaptable such that they meet Building Regulation M4(3) 'wheelchair user dwellings'. Housing SPG Standards 15 and 16 relate to the provision of lifts. Good practice standard - the provision of an ISO standard 13 person lift in a configuration which can accommodate a trolley bed (see Department of Health Technical Memorandum 08-02: Lifts).	Accessible and easily adaptable homes can meet the changing needs of current and future occupants.
	Does the proposal ensure that every non-ground floor dwelling is accessible by a lift that can accommodate an ambulance trolley?			One of the main methods of transportation of immobile patients is by trolley bed. Non-ground floor dwellings should be accessible by a lift that can accommodate an ambulance trolley.
c. Healthy living	Does the proposal provide dwellings with adequate internal space, including sufficient storage space and separate kitchen and living spaces?	Yes: Dwellings are designed in accordance with London Plan space standards.	London Plan Policy 3.5 (Table 3.3 - minimum space standards for new dwellings) and Housing SPG Standard 24 on dwelling space standards.	Sufficient space is needed to allow for the preparation and consumption of food away from the living room to avoid the 'TV dinner' effect.
	Does the proposal encourage the use of stairs by ensuring that they are well located, attractive and welcoming?	Yes: Communal stairs will be easily accessible, attractive, welcoming and adequately lit to encourage residents to use them.	Housing SPG Standard 25 - dwellings should accommodate the furniture, access and activity space requirements relating to the declared level of occupancy. Also, Housing SPG Standard 28 on privacy and Standard 31 on ceiling heights. Housing SPG Standards 12 to 16 relate to shared internal circulation, cores and lifts.	Rather than having lifts at the front and staircases at the back of buildings, it is preferable to have them located at the front to encourage people that can to use them.

Theme 1: Healthy Housing				
Issue	Key questions	Yes /No / Not relevant Comment	Policy requirements and standards	Why is it important
d. Housing mix and affordability	Does the proposal provide affordable family sized homes?	Overall the proposed development will provide 52 dwellings, comprising 1-bedroom, 2-bedroom and 3-bedroom flats. Of the dwellings, 34 will be private sale and 18 will be affordable housing. The mix of units is considered appropriate to a development of this size and will bring about a community comprising a variety of resident's from single people, couples and families.	London Plan Policy 3.8 Housing choice . London Plan Policy 3.11 Affordable housing targets seeks to maximise affordable housing provision and to ensure an average of at least 17,000 more affordable homes per year in London over the term of the London Plan. 60% of the affordable housing provision should be for social and affordable rent and 40% for intermediate rent or sale. The Mayor's Homes for Londoners: Affordable Homes Programme 2016-21 is a £3bn fund to help start building at least 90,000 affordable homes by 2021.	The provision of affordable housing can create mixed and socially inclusive communities. The provision of affordable family sized homes can have a positive impact on the physical and mental health of those living in overcrowded, unsuitable or temporary accommodation. Both affordable and private housing should be designed to a high standard ('tenure blind').

Theme 2: Active Travel				
Issue	Key questions	Yes / No / Not relevant Comment	Policy requirements and standards	Why is it important
a. Promoting walking and cycling	Does the proposal promote cycling and walking through measures in a travel plan, including adequate cycle parking and cycle storage?	<p>Yes: A total of 28 short-stay cycle spaces will be provided for the commercial spaces. 4 long-stay cycle parking spaces for the staff will be provided in a cycle store at first floor level.</p> <p>The residential units will have a dedicated cycle storage area on the first floor, directly accessible from the main elevator able to accommodate up to a total of 120 cycle storage spaces.</p>	London Plan Policy 6.3 (C) Travel plans London Plan Policy 6.9 Cycling. London Plan Policy 6.10 Walking. London Plan - Parking Addendum to Chapter 6 on cycle parking: Table 6.3 Cycle parking minimum standards. Housing SPG Standards 20 and 21 on cycle storage.	A travel plan can address the environmental and health impacts of development by promoting sustainable transport, including walking and cycling. Cycle parking and storage in residential dwellings can encourage cycle participation.
b. Safety	Does the proposal include traffic management and calming measures and safe and well lit pedestrian and cycle crossings and routes?	N/A: In terms of traffic management and calming measures, these are not required due the size/location of the development.	London Plan Policy 6.9 Cycling. London Plan Policy 6.10 Walking.	Traffic management and calming measures and safe crossings can reduce road accidents involving cyclists and pedestrians and increase levels of walking and cycling.
c. Connectivity	Does the proposal connect public realm and internal routes to local and strategic cycle and walking networks and public transport?	<p>The site's location is sustainable with good access to local walking/cycling routes and public transport networks such as rail and buses. There are advanced stop lines for cyclists at the south and north arms of Green Lanes/North Circular Road signalised junction. There is also a segregated cycle lane along North Circular Road. In terms of walking, the site is well located in terms of its proximity to local facilities, amenities as well as town centre shops and services.</p> <p>The site is located within 700m walking distance from Palmers Green Railway Station and 1.6km from Bounds Green Station.</p>	London Plan Policy 6.9 Cycling - Map 6.2 Cycle superhighways. London Plan Policy 6.10 Walking - Map 6.3 Walk London Network. Green Infrastructure: The All London Green Grid SPG (March 2012). Transport for London Legible London. Transport for London Bus Service Planning Guidelines.	Developments should prioritise the access needs of cyclists and pedestrians. Routes should be safe, direct and convenient and barriers and gated communities should be avoided. Developments should be accessible by public transport.

Theme 2: Active Travel

Issue	Key questions	Yes / No / Not relevant Comment	Policy requirements and standards	Why is it important
d. Minimising car use	Does the proposal seek to minimise car use by reducing car parking provision, supported by the controlled parking zones, car free development and car clubs?	Yes: The site is in a sustainable location within close proximity to public transport links. Secure cycle storage spaces are being provided.	London Plan Policy 6.13 Parking - Table 6.2 Car parking standards (Parking addendum to chapter 6). Housing SPG Standards 17 to 19 on car parking provision.	Space for pedestrians and cyclists should be given priority over commercial and private vehicles. Maximum car parking levels allows for provision to be reduced as far as practicable. Car clubs can be effective in reducing car use and parking demand at new residential developments.

Theme 3: Healthy Environment

Issue	Key questions	Yes / No / Not relevant Comment	Policy requirements and standards	Why is it important
a. Construction	Does the proposal minimise construction impacts such as dust, noise, vibration and odours?	<p>Yes: Construction site impacts will be minimised through site monitoring and adopting best practices to reduce air, noise, vibration and odours.</p> <p>The site will also be registered with the Considerate Constructors Scheme.</p>	<p>London Plan Policy 5.3 Sustainable design and construction.</p> <p>London Plan Policy 5.18 Construction, excavation and demolition waste.</p> <p>The Control of Dust and Emissions During Construction and Demolition SPG (July 2014).</p> <p>Housing SPG Standard 34 on environmental performance.</p>	<p>Construction sites can have a negative impact on an area and can be perceived to be unsafe. Construction activity can cause disturbance and stress, which can have an adverse effect on physical and mental health.</p> <p>Mechanisms should be put in place to control hours of construction, vehicle movements and pollution.</p> <p>Community engagement before and during construction can help alleviate fears and concerns.</p>
b. Air quality	Does the proposal minimise air pollution caused by traffic and energy facilities?	An Air Quality Assessment has been undertaken by Aether Ltd. It is recommended that mechanical ventilation is installed in all the residential unit, as concentrations are predicted to be close to the objective at façade of the site closest to the North Circular. In addition, other measures such as providing secure and covered cycle storage, providing a travel plan, and installing electric charging points, should be considered to reduce the emissions arising from the development. Please refer to the report for further detail.	<p>London Plan Policy 7.14 Improving air quality.</p> <p>At least 'air quality neutral' - Housing SPG Standard 33 on air quality.</p> <p>London Plan Policy 5.10 Urban greening.</p> <p>London Plan Policy 5.3 Sustainable design and construction.</p>	The long-term impact of poor air quality has been linked to life-shortening lung and heart conditions, cancer and diabetes.

Theme 3: Healthy Environment

Issue	Key questions	Yes / No / Not relevant Comment	Policy requirements and standards	Why is it important
c. Noise	Does the proposal minimise the impact of noise caused by traffic and commercial uses through insulation, site layout and landscaping?	Dwellings will be designed to achieve airborne sound insulation values that improve upon Building Regulation Part E standards. The soft landscaping around the site will also create a more pleasant acoustic environment. A Noise Impact Assessment has not been undertaken.	London Plan Policy 7.15 Reducing and managing noise, improving and enhancing the acoustic environment and promoting appropriate soundscapes. Limit the transmission of noise to sound sensitive rooms - Housing SPG Standard 30 on noise.	Reducing noise pollution helps improve the quality of urban life.
d. Open space	Does the proposal retain or replace existing open space and in areas of deficiency, provide new open or natural space, or improve access to existing spaces? Does the proposal set out how new open space will be managed and maintained?	The proposed development includes private open space in the form of private balconies. There will also be a resident's garden and play area and provision of a green sedum communal terrace on the upper levels.	London Plan Policy 7.1 Lifetime neighbourhoods. London Plan Policy 7.18 Protecting open space and addressing deficiency, Table 7.2 Public open space categorisation. London Plan Policy 7.19 Biodiversity and access to nature. Housing SPG Standards 3 and 4 on communal and public open space.	Access to open space has a positive impact on health and wellbeing. Living close to areas of green space, parks, woodland and other open space can improve physical and mental health regardless of social background. To maintain the quality and usability of open spaces an effective management and maintenance regime should be put in place.

Theme 3: Healthy Environment				
Issue	Key questions	Yes / No / Not relevant Comment	Policy requirements and standards	Why is it important
e. Play space	Does the proposal provide a range of play spaces for children and young people?	The proposed development includes private amenity space and is within close proximity of public green open spaces, including Broomfield Park, Tottenham Recreation Ground and Alexandra Park.	London Plan Policy 3.6 Children and young people's play and informal recreation facilities. Shaping Neighbourhoods: Play and Informal Recreation SPG (Sept 2012) - quantity Benchmark Standard of a minimum of 10 square metres per child regardless of age (4.24) and accessibility to play space Benchmark Standard (Table 4.4). Housing SPG Standard 5 on play space.	Regular participation in physical activity among children and young people is vital for healthy growth and development. The location of play spaces should be accessible by walking and cycling routes that are suitable for children to use.
f. Biodiversity	Does the proposal contribute to nature conservation and biodiversity?	Yes: The proposal will look to enhance the ecological value through the provision of private amenity space and a landscaped garden.	London Plan Policy 7.19 Biodiversity and access to nature. Table 7.3 - London regional Biodiversity Action Plan habitat targets for 2020. Housing SPG Standard 40 on ecology.	Access to nature and biodiversity contributes to mental health and wellbeing. New development can improve existing, or create new, habitats or use design solutions (green roofs, living walls) to enhance biodiversity.
g. Local food growing	Does the proposal provide opportunities for food growing, for example by providing allotments, private and community gardens and green roofs?	No: Site not of a scale whereby provision of community food growing is considered feasible however, communal and private amenity areas are provided.	London Plan Policy 5.10 Urban greening. London Plan Policy 7.22 Land for food. London Plan Policy 5.11 Green roofs and development site environs.	Providing space for local food growing helps promote more active lifestyles, better diets and social benefits.

Theme 3: Healthy Environment				
Issue	Key questions	Yes / No / Not relevant Comment	Policy requirements and standards	Why is it important
h. Flood risk	Does the proposal reduce surface water flood risk through sustainable urban drainage techniques, including storing rainwater, use of permeable surfaces and green roofs?	Yes: Sustainable Drainage Systems are to be employed where practical, including permeable paving and an attenuation system.	London Plan Policy 5.3 Sustainable design and construction. London Plan Policy 5.11 Green roofs and development site environs. London Plan Policy 5.13 Sustainable drainage. Flooding and drainage - Housing SPG Standards 38 and 39.	Flooding can result in risks to physical and mental health. The stress of being flooded and cleaning up can have a significant impact on mental health and wellbeing. It is likely that increasing development densities and building coverage coupled with more frequent extreme weather events will increase urban flood risk.
i. Overheating	Does the design of buildings and spaces avoid internal and external overheating, through use of passive cooling techniques and urban greening?	An overheating assessment has not been undertaken.	London Plan Policy 5.3 Sustainable design and construction. London Plan Policy 5.9 Overheating and cooling. London Plan Policy 5.10 Urban greening. London Plan Policy 5.11 Green roofs and development site environs. Overheating - Housing SPG Standards 36.	Climate change with higher average summer temperatures is likely to intensify the urban heat island effect and result in discomfort and excess summer deaths amongst vulnerable people. Urban greening - tree planting, green roofs and walls and soft landscaping can help prevent summer overheating.

Theme 4: Vibrant Neighbourhoods

Issue	Key questions	Yes / No / Not relevant Comment	Policy requirements and standards	Why is it important
a. Health services	Has the impact on healthcare services been addressed?	Yes: The scale of the development is such that there will be minimal impact on healthcare services. NHS Choices search results included in Appendix B.	London Plan Policy 3.17 Health and social care facilities. NHS London Healthy Urban Development Unit Planning Contributions Tool (the HUDU Model). Social Infrastructure SPG (2015).	Poor access and quality of healthcare services exacerbates ill health, making effective treatment more difficult. The provision of support services and advice on healthy living can prevent ill health.
b. Education	Has the impact on primary, secondary and post-19 education been addressed?	Yes: The site is well served by nearby educational establishments.	London Plan Policy 3.18 Education facilities.	Access to a range of primary, secondary and post-19 education improves self-esteem, job opportunities and earning capacity.
c. Access to social infrastructure	Does the proposal contribute to new social infrastructure provision that is accessible, affordable and timely? Have opportunities for multi-use and the co-location of services been explored?	It is not proposed to provide any social infrastructure on the site which is considered acceptable given the scale of the proposed development.	London Plan Policy 3.16 Protection and enhancement of social infrastructure. London Plan Policy 7.1 Lifetime neighbourhoods. Social Infrastructure SPG (2015).	Good access to local services is a key element of a lifetime neighbourhood and additional services will be required to support new development. Not doing so will place pressure on existing services. Future social infrastructure requirements are set out in Borough infrastructure plans and developments will be expected to contribute towards additional services and facilities.

Theme 4: Vibrant Neighbourhoods				
Issue	Key questions	Yes / No / Not relevant Comment	Policy requirements and standards	Why is it important
d. Local employment and healthy workplaces	<p>Does the proposal include commercial uses and provide opportunities for local employment and training, including temporary construction and permanent 'end-use' jobs?</p> <p>Does the proposal promote the health and wellbeing of future employees by achieving BREEAM health and wellbeing credits?</p>	<p>The proposed development includes commercial space which will bring about employment opportunities for local people.</p> <p>Construction process will create employment opportunities and supply opportunities to local businesses.</p> <p>Opportunities for local work force to receive training during site construction.</p>	<p>London Plan Policy 4.12 Improving opportunities for all and London Plan Policy 8.2 Planning obligations.</p> <p>London Plan Policy 7.1 Lifetime neighbourhoods.</p> <p>Workplace environment - BREEAM health and wellbeing credits.</p>	<p>Unemployment generally leads to poverty, illness and a reduction in personal and social esteem. Employment can aid recovery from physical and mental illnesses.</p> <p>Creating healthier workplaces can reduce ill health and employee sickness absence.</p>
e. Access to local food shops	<p>Does the proposal provide opportunities for local food shops?</p> <p>Does the proposal avoid an over concentration or clustering of hot food takeaways in the local area?</p>	Yes: The proposed development includes commercial space.	<p>London Plan Policy 4.7 Retail and town centre development.</p> <p>London Plan Policy 4.8 Supporting a successful and diverse retail sector.</p> <p>London Plan Policy 4.9 Small shops.</p> <p>London Plan Policy 7.1 Lifetime neighbourhoods.</p>	A proliferation of hot food takeaways and other outlets selling fast food can harm the vitality and viability of local centres and undermine attempts to promote the consumption of healthy food, particularly in areas close to schools.

Theme 4: Vibrant Neighbourhoods				
Issue	Key questions	Yes / No / Not relevant Comment	Policy requirements and standards	Why is it important
f. Public realm	<p>Does the design of the public realm maximise opportunities for social interaction and connect the proposal with neighbouring communities?</p> <p>Does the proposal allow people with mobility problems or a disability to access buildings and places?</p>	<p>The proposed development includes communal amenity space, allowing for opportunities for social interaction within the future residents.</p> <p>90% of the new dwellings will be designed and built to Building Regulations Approved Document M4 (2) standards, with 10% to Part M4(3).</p>	<p>London Plan Policy 7.1 Lifetime neighbourhoods.</p> <p>London Plan Policy 7.2 An inclusive environment.</p> <p>London Plan Policy 7.5 Public realm.</p> <p>Shaping Neighbourhoods. Accessible London: Achieving and Inclusive Environment SPG (Oct 2014).</p> <p>Housing SPG Standard 10 on active frontages.</p>	<p>The public realm has an important role to play in promoting walking and cycling, activity and social interaction. It also affects people's sense of place, security and belonging. It is a key component of a lifetime neighbourhood.</p> <p>Shelter, landscaping, street lighting and seating can make spaces attractive and inviting.</p> <p>Implementing inclusive design principles effectively creates an accessible environment, in particular for disabled and older people.</p>
