Tree Survey Action Analysis

Tree: 362

TagNo: 362

Wellingtonia

Sequoiadendron giganteum

Tree Comment:

Survey Comment: Lost apical dominance, resulting in several lower lateral limbs growing exponentially. Reduce end weight from heavily weighted limbs to reduce risk of future failure (MEWP required). Physical root damage noted to block pavers and tarmac in vicinity.

Action Recommendations:

Reduce crown(s)

By specified percentage (see comment)

Done
