4. Description of Proposed Works

Please describe the proposed works:

Proposal to replace existing internal boiler with new external boiler. As the current boiler flue is not to spec, replacing the internal boiler would also require replacing the flue within the existing chimney, posing significant risk of harm to the historic fabric. As such a site visit between EHDC CO Richard Whittington, Architect Adam Knibb and Client deemed a new external boiler would be the most sensitive and appropriate replacement. Full details of the proposed scope of works and their impact have been included in an accompanying Heritage Statement and Design and Access statement.

Mr Whittington met with Adam Knibb on site to discuss the most sensitive approach to replacing the broken boiler. This was due to the client already being without heating for nearly a month and the boiler's replacement is an urgent matter. The location of the boiler, penetration to the external wall for the oil pipe and the connection to the existing heating system have all been agreed in principal and Mr Whittington was in support of the works as it was the option with the most minimal risk of harm to the listed building. Our application reflects what was discussed and verbally agreed on site.
